Agriculture, agricultural science, and agronomy. The three terms are often confused. However, they cover different concepts: Agriculture is the set of activities that transform the environment

for the production of animals and plants for human use. Agriculture concerns techniques, including the application of agronomic research.

Agricultural science - Wikipedia

Basic Science Teaching agriculture in primary school classrooms introduces young students to basic scientific procedures and shows them how to apply these lessons to daily life. For example, an agriculture instructor can teach students about how bees make honey, how trees grow and make fruit or nuts, and how corn can be made into oil, for example.
