Exploring God's Design for Discipleship: Making and Passing Faith to Future Generations

**Electronics and Instrumentation**  
The book contains 267 questions and answers for job interview for hiring on offshore drilling rigs.  
*Biblical Grandparenting (Grandparenting Matters)* Simon and Schuster  
The latest edition of this best-selling textbook by Miles and Huberman not only is considerably expanded in content, but is now available in paperback. Bringing the art of qualitative analysis up-to-date, this edition adds hundreds of new techniques, ideas and references developed in the past decade. The

increase in the use of computers in qualitative analysis is also reflected in this volume. There is an extensive appendix on criteria to choose from among the currently available analysis packages. Through examples from a host of social science and professional disciplines, Qualitative Data Analysis remains the most comprehensive and complete treatment of this topic currently available to scholars and applied researchers. Handbook for Conducting Drug Abuse Research with Hispanic Populations

**"Guide to Completing a Thesis, Dissertation, Or Action Research Project"**

Petrogav International  
This volume, emerging from a cross-national study of teachers' perception of good

citizenship, addresses two fundamental questions: What do teachers see as important in citizenship education? How do these perceptions facilitate or hinder the preparation of good citizens? While providing rich and useful data on the latest developments of citizenship education in various contexts, this book also offers an all-round review of concepts and arguments on the subject, as well as insightful comparative analyses of the findings emerged from the case studies. One encouraging conclusion drawn from these studies is that teachers across nations share similar goals and objectives that seem to have transcended cultural

and political boundaries.

Case Study Research: A Program Evaluation Guide for Librarians

Psychology Press  
Given the importance of the development of intellectualism and the need to ensure equity and access to learning experiences, educators at all levels must be aware of research-based protocols to identify, serve, and evaluate programs for diverse gifted learners. It is essential to understand how gifted education can increase equity in identification practices for

---

historically underrepresented groups, what the specific curricular opportunities are that must be provided to learners to develop gifted programs, and what the key considerations are to the design and implementation of authentic and equitable programs for gifted learners. Creating Equitable Services for the Gifted: Protocols for Identification, Implementation, and Evaluation curates cutting-edge protocols in the field of gifted education related to the areas of equitable identification, implementation of services, and

programmatic assessment. These protocols seek to initiate discussion and critical discourse regarding diverse gifted learners among higher education faculty, state department personnel, district administrators, and classroom teachers. Covering topics such as digital differentiation, equitable assessment, and STEM education, this text is ideal for teacher education programs, preparation programs, university degree programs, university credential programs, certificate programs, faculty, graduate students,

state departments of education, superintendents, coordinators, administrators, teachers, professors, academicians, and researchers.

This course covers aspects like HSE, Process, Mechanical, Electrical and Instrumentation & Control that will enable you to apply for any position in the Oil and Gas Industry.

### **Approaches and Methods** Corwin

Press

A formal training program with theoretical and practical components is essential for all emergency medical personnel involved in providing care for critically injured patients.

Communication, effective first aid, and on time transportation to a health center play a major role in improving quality of care for critically injured patients.

Using life experience examples, participants in the study emphasized the importance of each factor on the delivery of quality care for critically

injured patients.

Recommendations based on the study findings included two main categories.

The first category illustrated recommendations to stakeholders, and the second category reflected recommendations for further study.

Stakeholders in this study included healthcare leaders in Afghanistan, healthcare professionals involved in providing health care in Afghanistan, and local people in Afghanistan. The modified van Kaam method in the qualitative phenomenological study involved conducting

---

semistructured interviews, which were audio-taped and transcribed. The rationale for using the phenomenological approach in the qualitative study was to describe in-depth experiences of health care professionals. Moustakas (1994) modified van Kaam method explored the lived experiences and perceptions of 17 doctors and nurses relating to emergency trauma care for critically injured patients. Data analysis revealed important factors that could enhance the quality of prehospital care for civilian casualties of

landmine and unexploded ordnance (UXO) blast injuries in Afghanistan. The four major themes that emerged from participants responses to interview questions included communication, formal training for emergency medical personnel, transportation to a higher-level center, and quality of prehospital care. Petrogav  
International Designing and writing a qualitative dissertation methodology chapter can be done!  
Qualitative Dissertation Methodology: A Guide for Research Design and Methods

functions as a dissertation advisor to help students construct and write a qualitative methodological framework for their research. Drawing from the challenges author Nathan Durdella has experienced while supervising students, the book breaks down producing the dissertation chapter into smaller pieces and goes through each portion of the methodology process step by step. With a warm and supportive tone, he walks students through the process from the very start, from choosing chairs and developing qualitative support networks to outlining the qualitative chapter and delving into the writing. By the end of the book, students

---

will have completed the most challenging chapter of a qualitative dissertation and laid a strong foundation for the rest of their dissertation work.

Job interview questions and answers for employment on Offshore Drilling
