This is the basic Electrical  
Engineering Interview  
Question asked in an  
interview. There are two types  
of electrical circuits called  
Passive or Active Networks. A  
Passive network is a network  
that contains passive elements  
in its network such as  
Resistance, Capacitance, or  
Inductance whereas an Active  
Network is a network that  
contains active elements in its  
network such as Current or  
Voltage Sources.
