**Technical Interviews: Excel with Ease ABC-CLIO**

Female leadership has been a topic of debate for centuries between theologians and laity, Christians and non-Christians, as well as men and women. This study will present a theological analysis of the debate concerning male and female roles in

leadership positions and ministry. An analysis of the role of the female pastor's spouse, the effects of sexism in religion, and how it has influenced the ecclesiology of the church will be examined as well. Reflections of case studies employing biblical narratives of couples in the Bible will be used to substantiate the roles of women leaders and their spouses. Each scenario identifies the particular role of the husband and the wife, specifically when the wife is the spiritual leader. Read with anticipation the outcome of biblical interpretation of the roles of the female leader and their spouses.

A Philosophic and Practical Guide Petrogav International

This enlightening book presents a hypothetical evaluation case study to explore and propose tools for effective library program assessment. • A hypothetical program evaluation case study • Vignettes and examples related to the hypothetical case • Focus questions, a case application, and application questions and exercises with each chapter • End-of-chapter references • A brief glossary of common case-study terms • Appendixes of additional program evaluation materials

**150 technical questions and answers for job interview Offshore Oil & Gas Platforms** Petrogav International

This book offers you a brief, but very involved look into the operations in the drilling of an oil & gas wells that will help you to be prepared for job interview at oil & gas companies. From start to finish, you'll see a general prognosis of the drilling process. If you are new to the oil & gas industry, you'll enjoy having a leg up with the knowledge of these processes. If you are a seasoned oil & gas person, you'll enjoy reading what you may or may not know in these pages. This course provides a non-technical overview of the phases, operations and terminology used on offshore drilling platforms. It is intended also for non-drilling personnel who work in the offshore drilling, exploration and production industry. Hearing Before the Subcommittee on Energy and Environment of the Committee on Science, House of Representatives, One Hundred Sixth Congress, First Session, March 3 and March 10, 1999 Petrogav International

A formal training program with theoretical and practical components is essential for all emergency medical personnel involved in providing care for critically injured patients. Communication, effective first aid, and on time transportation to a health center play a major role in improving quality of care for critically injured patients. Using life experience examples, participants in the study emphasized the importance of each factor on the delivery of quality care for critically injured patients. Recommendations based on the study findings included two main categories. The first category illustrated recommendations to stakeholders, and the second category reflected recommendations for further study. Stakeholders in this study included healthcare leaders in Afghanistan, healthcare professionals involved in providing health care in Afghanistan,

and local people in Afghanistan. The modified van Kaam method in the qualitative phenomenological study involved conducting semistructured interviews, which were audio-taped and transcribed. The rationale for using the phenomenological approach in the qualitative study was to describe in-depth experiences of health care professionals. Moustakas (1994) modified van Kaam method explored the lived experiences and perceptions of 17 doctors and nurses relating to emergency trauma care for critically injured patients. Data analysis revealed important factors that could enhance the quality of prehospital care for civilian casualties of landmine and unexploded ordnance (UXO) blast injuries in Afghanistan. The four major themes that emerged from participants responses to interview questions included communication, formal training for emergency medical personnel, transportation to a higher-level center, and quality of prehospital care.

The First Gentleman Petrogav International

This course will provide participants a better understanding of the issues faced in all aspects of drilling operations, with a particular focus on the unique aspects of offshore operations.

DHHS Publication No. (PHS). Universal-Publishers

This volume, emerging from a cross-national study of teachers' perception of good citizenship, addresses two fundamental questions: What do teachers see as important in citizenship education? How do these perceptions facilitate or hinder the preparation of good citizens? While providing rich and useful data on the latest developments of citizenship

education in various contexts, this book also offers an all-round review of concepts and arguments on the subject, as well as insightful comparative analyses of the findings emerged from the case studies. One encouraging conclusion drawn from these studies is that teachers across nations share similar goals and objectives that seem to have transcended cultural and political boundaries.

Case Study Research: A Program Evaluation Guide for Librarians WestBow Press

Designed to be used during the research process, Conducting Educational Research: Guide for Completing a Major Project, Second Edition, walks readers through each step of a research project or thesis, including developing a research question, performing a literature search, developing a research plan, collecting and analyzing data, drawing conclusions, and sharing the conclusions with others. Throughout the book, Daniel J. Boudah covers all types of research (including experimental, descriptive, qualitative, group designs, and single subject designs) and helps readers link research questions to designs, designs to data sources and data sources to appropriate analyses. Each chapter includes activities and exercises to ensure the researcher is asking the right questions and producing a quality project.

Emergency Medical Systems Petrogav International

Chemistry is a human endeavor that relies on basic human qualities like creativity, insights, reasoning, and skills. It depends on habits of the mind: skepticism, tolerance of ambiguity, openness to new ideas, intellectual honesty, curiosity, and communication. Young female students begin studying chemistry curiosity; however, when unconvinced, they become skeptical. Researches focused on gender studies have indicated that attitudes toward science education differ between males and females. A declining interest in chemistry and the under representation of females in the chemical science was found (Jacobs, 2000). This study investigated

whether self-confidence toward chemistry, the influence of role models, and knowledge about the usefulness of chemistry were affecting the attitudes toward chemistry, of 183 high school young females across the United States. The young female students surveyed, had studied chemistry for at least one year prior to participating in the study during the fall semester of 2003. The schools were randomly selected represented diverse economic backgrounds and geographical locations. Data were obtained using Chemistry Attitude Influencing Factors (CAIF) instrument and from interviews with a focus group of three young female students about the effect of self-confidence toward chemistry, the influence of role models, and knowledge about the usefulness of chemistry on their decision to study chemistry. The CAIF instrument consisted of a 12-items self-confidence questionnaire (Confis), 12-items each of the influence of role models (RoMoS) and knowledge about usefulness of chemistry (US) questionnaire. Confis was adopted (with permission) from CAEQ (Coll & Dalgety, 2001), and both RoMoS and US were modified from TOSRA (Fraser, 1978), public domain document. The three young female students interviewed, gave detailed responses about their opinions regarding self-confidence toward chemistry, the influence of role models, and knowledge about the usefulness of chemistry on their attitudes toward the study of chemistry. Both quantitative (a Likert-type Scale questionnaire) and qualitative (open-ended questions) items were used to investigate the views of young female students. Results of the survey were analysed using a correlation test. Significant differences were found in the Likert-type scale scores, providing evidences supporting literature that suggests, self-confidence toward chemistry, the influence of role models, and knowledge about the usefulness of chemistry affect the decision of young female students about the study of chemistry. Interview responses corroborated the results from the survey. Strategies for addressing the problems and recommendations for further studies have been suggested.
