Study Guide for Basic Pharmacology for Nurses - E-Book
Elsevier Health Sciences

This student study guide contains a variety of exercises specifically designed to reinforce content presented in the textbook. Chapter worksheets feature more than 1,800 study questions, 160 drug calculation and dosage problems, and case-based critical thinking exercises. Like the Kee text, the study guide features a strong nursing focus and comprehensive coverage of drug dosage calculations, including numerous sample drug labels. Over 1,800 study questions reinforce textbook concepts and prepare you for the NCLEX® examination. An extensive section of drug calculation problems helps you master important dosage calculation methods. Case-based critical thinking exercises enhance your understanding of nursing responsibilities in drug therapy. Sample drug labels familiarize you

with the labels you will encounter in clinical practice. A basic math review appendix provides a helpful review of key mathematics concepts. Answers for all exercises are included to facilitate self-study. Thoroughly updated content corresponds to the Kee text, including a new chapter on medication safety. Additional NCLEX® examination-style review questions reflect an increased focus on alternate item-format questions. Approximately 100 new prioritization activities provide practice in identifying key nursing actions.
