Acute Care Surgery Jones & Bartlett Learning

This unique, authoritative book explores the spectrum of trauma care provided in the UK, discussing procedures for specific trauma presentations as well as the nurse's role in providing care in the emergency setting. Chapters on the relevant biosciences are included, which serve as an excellent source of review or instruction for nurses of all levels. In addition to the basic science dimensions of trauma nursing, the book also addresses clinical, psychosocial, and psychological aspects of care. Its structured approach to patient management presents information in an easy-to-follow format. Research evidence is used throughout to support the text, laying the

foundation for expert nursing practice. Multidisciplinary approach makes the book relevant to current practice. Key learning points are highlighted with the text to help direct the reader's attention and encourage learning. A wide range of expert contributors makes the book a credible and authoritative source. Easy-to-understand chapters on fundamental biosciences expand readers' knowledge. Extensive illustrations, line drawings, and easy-to-read tables provide clear, visual explanations of important material. Appropriate references and recommended sources for further reading help readers develop knowledge and insight. Structured textbook format facilitates learning, enables information to be found quickly, and makes the book more user-friendly. The section on pre-hospital care presents a key piece of the trauma care spectrum, rather than focusing solely on the nurse's role in in-hospital care.

Now in a revised and expanded second edition, this unique text discusses the opportunities and challenges to the practice of orthopedic surgery in resource-limited environments around the world. Sensibly divided into thematic sections, part I examines barriers to care, from the poorly recognized global burden of orthopedic conditions and the less than ideal equipment to the cultural considerations and ethical dilemmas inherent in such situations. General clinical topics are covered in part II, such as non-surgical approaches and anesthesia, while the remaining sections discuss adult and pediatric trauma, presented in an anatomical format for easy reference with a focus on the natural history and the best treatment methods within existing limitations, followed by musculoskeletal infections, non-infectious pediatric conditions, reconstruction, and amputations. Topics new to this edition include the management of non-unions by induced membrane techniques, autologous bone grafting, bone growth and burn charts, the management of neck and back pain, and principles of orthopedic rehabilitation. Written and edited by experts with years of experience

working in austere settings, this second edition of Global Orthopedics is a seamless transition from the original and expands the range of possible management strategies in places desperate for orthopedic care, making it a must for all surgeons and practitioners planning to work in such challenging settings.

Get Through MCEM Part B: Data Interpretation Questions

Cambridge University Press

The only book dedicated to the College of Emergency Medicine's Membership examination, this book contains numerous questions and answers, together with data sets and clinical examples to help prepare candidates taking part B of this and other higher examinations in emergency medicine. All trainees wishing to pursue a career in Emergency Medicine have to have to pass the College of Emergency Medicine's own membership examination (MCEM) to enter training and pass the Fellowship examination (FCEM) to complete their Certificate of Specialist Training (CST). This book is a study guide which can be used in conjunction with standard emergency medicine texts. It follows the MCEM syllabus exactly and each chapter has three key parts: core facts which supplements revision for parts A and B, clinical scenarios, including data, which can be used to prepare for part B, and sample answers for questions. This book prepares candidates for examination success in part B, the data interpretation part of the MCEM examination. The authors are doctors all dedicated to the acute or emergency setting and who have collated extensive material to help in candidates' preparation for the MCEM examination. They have run a successful revision course for candidates taking the examination.
