edition maintains and therefore the features that made the first edition so popular, while updating data, examples, and changes to R in line with the current version. See What ' s New in the Second Edition: Increased emphasis on more idiomatic R provides a grounding in the functionality of base R. Discussions of the use of RStudio helps new R users avoid as many pitfalls as possible. Use of knitr package makes code easier to read

and therefore easier to reason about. Additional information on computer-intensive approaches motivates the traditional approach. Updated examples and data make the information current and topical. The book has an accompanying package, UsingR, available from CRAN, R ' s repository of user-contributed packages. The package contains the data sets mentioned in the text (data(packa ge="UsingR")),

answers to selected problems (answers()), a few demonstrations (demo()), the errata (errata()), and sample code from the text. The topics of this text line up closely with traditional teaching progression; however, the book also highlights computer-intensive approaches to motivate the more traditional approach. The authors emphasize realistic data and examples and rely on

visualization techniques to gather insight. They introduce statistics and R seamlessly, giving students the tools they need to use R and the information they need to navigate the sometimes complex world of statistical computing.

Application of Intelligent Systems in Multi-modal Information Analytics WH Freeman As seen in ESPN Films' Unguarded, a "powerful . . . bracing . . .

exceptional " true account of the former NBA and overseas pro's rise and harrowing fall (NPR Books). I was dead for thirty seconds. That's what the cop in Fall River told me. When the EMTs found me, there was a needle in my arm and a packet of heroin in the front seat. At basketball-crazy Durfee High School in Fall River, Massachusetts, junior guard Chris Herren carried his family's and the declining city's dreams on his skinny frame. He was heavily recruited by major universities, chosen as a McDonald's All-American, featured in a Sports Illustrated cover story, and at just seventeen years old became the central figure in Fall River Dreams, an acclaimed

book about the 1994 Durfee team's quest for the state championship. Leaving Fall River for college, Herren starred on Jerry Tarkanian's Fresno State Bulldogs team of talented misfits, which included future NBA players as well as future convicted felons. His gritty, tattooed, hip-hop persona drew the ire of rival fans and more national attention: Rolling Stone profiled him, 60 Minutes interviewed him, and the Denver Nuggets drafted him. When the Boston Celtics acquired his contract, he lived the dream of every Massachusetts kid—but off the court Herren was secretly crumbling, as his alcohol and drug use escalated and his life spiraled out of control. Twenty years later,

Chris Herren was a husband, a father, and a heroin junkie, who would flirt with death—and ultimately live to tell about it.
