Book Excerpt: stinies of the Easternworld, ought surely to be conversant with the most popular of Indiandramas, in which the customs of the Hindús, their opinions, prejudices, and fables, their religious rites, daily occupations and amusements, are reflected as in a mirror. Nor is the prose translation of Sir W. Jones (excellent though it be) adapted to meet therequirements of modern times. That translation was unfortunately made from corrupt

manuscripts (the best that could then be procured), inwhich the bold phraseology of Kálidása has been occasionally weakened, his delicate expressions of refined love clothed in an unbecoming dress, and his ideas, grand in their simplicity, diluted by repetition or amplification. It is, moreover, altogether unfurnished with explanatory annotations. The present translation, on the contrary, while representing the purest version of the drama, has abundant notes, sufficient to answer the exigencies of the non-oriental scholar. It may be remarked that in every Sanskrit play the wome

india, Dr. Ranganathan. These library science classics have been reprinted to make Dr. Ranganathan's work available to the current generation of librarians and for those to come. The book is a remarkable illustration of the application of systems analysis, study of work flow, and time and motion study to libraries. It also illustrates the need for the library manager and management to pay attention to the minutiae of library work and at the same to have a holistic view of library's functions. It is only very appropriate that Ranganathan provides an extract from the 'Mother' (page 66-72) by the mystic Shri Aurobindo to support this holistic approach to library administration.

This translation is of thirteen Sanskrit plays discovered in South India by the late Pandit Ganapati Sastri and edited by him in the Trivandrum Sanskrit Series. It comprises the following titles: 1. Pratijnayaugandharayana, 2. Svapnavasavadatta, 3. Carudatta, 4. Pancaratra, 5. Madhyamavyayoga, 6. Pratima-nataka, 7. Dutavakya, 8. Dutaghatotkaca, 9. Karnabhara, 10. Urubhanga, 11. Avimaraka, 12. Balacarita, and 13. Abhiseka. Sastri attributed all the thirteen plays to Bhasa and the prevailing opinion of the scholars is in agreement with him, though the available evidence is not conclusive and so the question still remains open. The translation was done by two eminent Sanskrit scholars. It was published as early as 1930 and a reprint is now issued in view of a persistent demand of scholars. Pandit Ganapati Sastri attributed all thirteen plays to Bhasa, a famous dramatist earlier than Kalidasa. Some verses are ascribed to Bhasa by medieval anthologies, but only ten with unanimity. We are told that he composed a Svapnavasavadattam (his best play) and that in

---

another play the device of the wooden elephant was used. Characteristic features of his work are described by Bana, and other poets evidently held him in high estimation. One or two verses from his plays are quoted by writers on poetics. Otherwise, the text of Bhasa's numerous plays had completely disappeared. The learned editor of the Trivandrum plays found that they contained a Svapnavasavadattam (the best play in the collection), and, in the Pratijna-Yaugandharayanam, a scene dealing with the wooden elephant. He noticed also certain peculiarities in the technique of the plays which he regarded as signs of antiquity. All these points confirmed the opinion that Bhasa was the author.

Thirty-four years have elapsed since the publication of the late Professor P. Maheshwari's text, An Introduction to the Embryology of Angiosperms, a work which for many years served as an invaluable

guide for students and a rich source book for research workers. Various texts dealing with sections of the broad spectrum of topics encompassed by Maheshwari in his book have appeared in the interim, but a compendious modern work dealing with the whole field has been lacking. This present volume splendidly meets the need, and it is altogether fitting that Professor B. M. Iohri, long an associate and close colleague of Professor Maheshwari and himself a prolific contributor to the subject, should have undertaken the task of editing it. When Maheshwari wrote, it was still feasible for one author to handle the subject, but today even someone with his fine breadth of vision and depth of understanding could not, alone, do it justice. So the effort has to be a collaborative one; and Professor Iohri's achievement has been to bring together a team of authoritative collaborators, assign them their responsibilities, and put them to work to produce a text as integrated in its treatment as the diversity of the subject would allow. The product vividly illustrates the advances that have been made in the study of angiosperm reproductive systems in the last 30 years, and the book is surely destined to become the new standard for student and researcher alike.

The present grammar has been prepared with a view to meet

the growing educational need of university students. The author has done his best to bring the present grammar up to the requirements of the students. In writing the various chapters of this book, the author has closely followed Pannini, as explained by Bhattoji Diksita. Many of the rules given here are translations of the relevant Sutras of Panini. The original Sutras are given in footnotes, where necessary. Sandhis and declensions are fully treated; compounds which dominate classical Sanskrit literature have received special attention; formation of feminine bases has been illustrated; Taddhita affixes have been arranged in an alphabetical order. A special feature of the present grammar is the chapter on the Conjugation of Verbs. The general rules given are amply illustrated by examples. All the verbs which change their pada when preceded by particular prepositions are given in an alphabetical order. The chapter on Syntax contains almost everything given in the first 20 chapters of author's Guide to Sanskrit Composition; the chapter on Prosody is based on the Chandomanjari and the Vrttaratnakara. The author has spared no pains to make the book as useful and as complete as possible.
