From the first people to leave Africa to the first to leave the planet, the urge to explore the unknown has driven human progress. Explorers tells the story of humanity's explorations, taking

the reader into the lives of some of the most intrepid people ever known. Throughout history, exploration has arisen from a wide range of impulses, from trade and the search for lands to colonize, to scientific curiosity and missionary zeal. This book tells the story of explorers of every type, from those chasing glory to those seeking enlightenment. In its pages, readers will meet some of history's most famous trail blazers- people whose courage opened frontiers, turned voids into maps, forged nations, connected cultures, and added to humankind's knowledge of the world by leaps and bounds. Each life is captured in context, by considering the knowledge of the

world in which the explorers lived, the factors that gave rise to their expeditions, and the technology available to them at the time. Their discoveries, and the consequences, are also considered in depth, and highlighted with beautiful maps, photographs, and illustrations. The tales of the explorers' assistants and companions are woven into the overall story, along with an examination of the qualities that made the them drop everything in pursuit of discovery.
