writer Donovan Hohn heard of the mysterious loss of thousands of bath toys at sea, he figured he would interview a few oceanographers, talk to a few beachcombers, and read up on Arctic science and geography. But questions can be like ocean currents: wade in too far, and they carry you away. Hohn's accidental odyssey pulls him into the secretive world of shipping conglomerates, the daring work of Arctic researchers, the lunatic

risks of maverick sailors, and the shadowy world of Chinese toy factories. Moby-Duck is a journey into the heart of the sea and an adventure through science, myth, the global economy, and some of the worst weather imaginable. With each new discovery, Hohn learns of another loose thread, and with each successive chase, he comes closer to understanding where his castaway quarry comes from and where it goes. In the grand tradition of

Tony Horwitz and David Quammen, Moby-Duck is a compulsively readable narrative of whimsy and curiosity.

with high hopes and a barely functional car, she meets the human condition head-on. By the time Taylor arrives in Tucson, Arizona, she has acquired a completely unexpected child, a three-year-old American Indian girl named Turtle, and must somehow come to terms with both motherhood and the necessity for putting down roots. Hers is a story about love and friendship, abandonment and belonging, and the discovery of surprising resources in apparently empty places. Available for the first time in mass-market, this edition of Barbara Kingsolver's bestselling novel, *The Bean Trees*, will be in stores everywhere in September. With two different but equally

handsome covers, this book is a fine addition to your Kingsolver library.

discovery into the world around you, you will enjoy this book. This invaluable reference book explores the hidden world of chemistry that surrounds us in our daily life: in the bedroom (perfumes, deodorants and sunscreens); the kitchen (nutrition, food preparation and commercial processing); the restaurant (wine, food additives and poisons). It leads you into the garden where a consumer's safety guide is essential, through the chemistry of soils, weeds and pesticides. It explores your car (petrol, batteries and solar energy), your home safety (toxicity and flammability), your shopping basket (plastics, glass and metals) and the environment (the ozone layer and	greenhouse effect). The serious science in this traveller's guide is clearly explained in terms everyone can understand. Illustrated with fascinating anecdotes, interesting snippets of information, and experiments which further clarify the topic, it is both informative and entertaining, and is an excellent reference source for real-life applications of chemistry.
