Charles de Lint's Newford novels, loosely linked "tales" with overlapping characters set in an imaginary modern North American city, are tales of magic and myth afoot on today's city streets. But at the center of every de Lint story is the miracle of the human heart. And at the heart of Spirits in the Wires are Saskia Madding and Christiana Tree, both of whom are tied to perennial Newford character, the writer Christy Riddell. Are either Saskia or Christiana real? Christy's girlfriend, Saskia, believes she was born in a Web site, while Christiana is Christy's "shadow-self"--all the parts of him that he cast out when he was seven years old. At a popular Newford on-line research and library Web site called the Wordwood, a mysterious "crash" occurs. Everyone visiting the site at the moment of the crash vanishes from where they were sitting in front of their computers. Saskia disappears right before Christy's eyes, along with countless others. Now Christy and his companions must journey into Newford's otherworld, where the Wordwood, it transpires, has a physical presence of its own...to rescue their missing friends and loved ones and to set this viral spirit right before it causes further harm. The Story of Kentucky Whiskey

Birkhäuser

The book is the volume of "The History of Science and Technology in Yuan Dynasty" among a series of books of "Deep into China Histories". The earliest known written records of the history of China date from as early as 1250 BC, from the Shang dynasty (c. 1600–1046 BC) and the Bamboo Annals (296 BC) describe a Xia dynasty (c. 2070–1600 BC) before the Shang, but no writing is known from the period The Shang ruled in the Yellow River valley, which is commonly held to be the cradle of Chinese civilization. However, Neolithic civilizations originated at various cultural centers along both the Yellow River and Yangtze River. These Yellow

River and Yangtze civilizations arose millennia before the Shang. With thousands of years of continuous history, China is one of the world's oldest civilizations, and is regarded as one of the cradles of civilization. The Zhou dynasty (1046–256 BC) supplanted the Shang and introduced the concept of the Mandate of Heaven to justify their rule. The central Zhou government began to weaken due to external and internal pressures in the 8th century BC, and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature and philosophy first developed during those troubled times. In 221 BC Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or "emperor" of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death, and was supplanted by the longer-lived Han dynasty (206 BC – 220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men, well-versed in calligraphy, history, literature, and philosophy, were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644–1912), which was replaced by the Republic of China in 1912, and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace, and periods of war and failed statehood – the most recent being the Chinese Civil War (1927–1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China; in some eras control stretched as far as Xinjiang and Tibet, as at present.

Traditional culture, and influences from other parts of Asia and the Western world (carried by waves of immigration, cultural assimilation, expansion, and foreign contact), form the basis of the modern culture of China.

John Paul Jones (born John Paul; July 6, 1747?– July 18, 1792) was the United States' first well known naval commander in the American Revolutionary War, and yet the details of his extraordinary career are little known. His fame, in the broad sense of enduring interest, ranks with that of Washington, Franklin, Jefferson, Hamilton, Adams, and Robert Morris; and, in his own particular province, he stands absolutely alone. To the average student of American history, mention of our Revolutionary Navy instantly suggests the name of Paul Jones, and no other. Yet, notwithstanding such singular distinction as a generality, but little is correctly known in detail as to the actual life and the real character of the man. The daily lives, the individual incidents, and the personal characters of our other very great men in that epoch are as open books. These men spent their lives in our country, and after they had passed away the materials for their histories were left in friendly hands. The reverse was true of Paul Jones. This is one of the rare books written about the life and achievements of this historical figure.

Spirits in the Wires

Greg Egan's *The Clockwork Rocket* introduced readers to an exotic universe where the laws of physics are very different from our own, where the speed of light varies in ways Einstein would never allow, and where intelligent life has evolved in unique and fascinating ways. Now Egan continues his epic tale of alien beings embarked on a desperate voyage to save their world . . . The generation ship *Peerless* is in search of advanced technology capable of sparing their home planet from imminent destruction. In theory, the ship is traveling fast enough that it can traverse the cosmos for generations--and still return home only a few years after they departed. But a critical fuel shortage threatens to cut their urgent voyage short, even as a population explosion stretches the ship's life-support capacity to its limits. When the astronomer Tamara discovers the Object, a meteor whose trajectory will bring it within range of the *Peerless*, she sees a risky solution to the fuel crisis. Meanwhile, the biologist Carlo searches for a better way to control fertility, despite the traditions and prejudices of their society. As the scientists clash with the ship's leaders, they find themselves caught up in two equally dangerous revolutions: one in the sexual roles of their species, the other in their very understanding of the nature of matter and energy. *The Eternal Flame* lights up the mind with dazzling new frontiers of physics and biology, as only Greg Egan could imagine them.

ROUGH DRAFT (Books 1-4)

From the Whiskey Rebellion to Prohibition to the recent revival of craft spirits, the history of whiskey, moonshine, and other spirits remains an important part

of Americana. Featuring historical photos, infographics, walking-tour maps, and noteworthy vintage newspaper clippings, *Dead Distillers* is a rich visual and textual reference to a key piece of American history.
