Complete Reprint of Harry Johnson's  
Bartenders' Manual, originally published 1882.  
"Harry Johnson was a professional bartender  
for most of his life and along with Jerry  
Thomas he was one of the first to write about  
his trade. Harry's rather opinionated thoughts  
on the bartending profession and how to run a  
bar, which takes up the first third of the book,  
make for a fascinating insight in to the world of  
nineteenth century bars. He wasn't afraid of  
boasting, describing one of his bars as "what  
was generally recognized to be the largest and  
finest establishment of the kind in this country,"  
but the advice is clearly spoken from the heart  
about a profession he really believes in."

Scholastic disputation, the formalized procedure of debate in the medieval university, is one of the hallmarks of intellectual life in premodern Europe. Modeled on Socratic and Aristotelian methods of argumentation, this rhetorical style was refined in the monasteries of the early Middle Ages and rose to prominence during the twelfth-century Renaissance. Strict rules governed disputation, and it became the preferred method of teaching within the university curriculum and beyond. In *The Medieval Culture of Disputation*, Alex J. Novikoff has written the first sustained and comprehensive study of the practice of scholastic disputation and of its formative influence in multiple spheres of cultural life. Using hundreds of published and unpublished sources as his guide, Novikoff traces

---

the evolution of disputation from its ancient origins to its broader impact on the scholastic culture and public sphere of the High Middle Ages. Many examples of medieval disputation are rooted in religious discourse and monastic pedagogy: Augustine's inner spiritual dialogues and Anselm of Bec's use of rational investigation in speculative theology laid the foundations for the medieval contemplative world. The polemical value of disputation was especially exploited in the context of competing Jewish and Christian interpretations of the Bible. Disputation became the hallmark of Christian intellectual attacks against Jews and Judaism, first as a literary genre and then in public debates such as the Talmud Trial of 1240 and the Barcelona Disputation of 1263. As disputation filtered into the public sphere, it also became a key element in iconography, liturgical drama, epistolary writing, debate poetry, musical counterpoint, and polemic. The Medieval Culture of Disputation places the practice and performance of disputation

at the nexus of this broader literary and cultural context.

Multi-item surveys are frequently used to study scores on latent factors, like human values, attitudes and behavior. Such studies often include a comparison, between specific groups of individuals, either at one or multiple points in time. If such latent factor means are to be meaningfully compared, the measurement structures including the latent factor and their survey items should be stable across groups and/or over time, that is 'invariant'. Recent

---

developments in statistics have provided new analytical tools for assessing measurement invariance (MI). The aim of this special issue is to provide a forum for a discussion of MI, covering some crucial ‘ themes ’ : (1) ways to assess and deal with measurement non-invariance; (2) Bayesian and IRT methods employing the concept of approximate measurement invariance; and (3) new or adjusted approaches for testing MI to fit increasingly complex statistical models and specific characteristics of survey data. The special issue started with a kick-off meeting where all potential contributors shared ideas on potential papers. This expert workshop was organized at Utrecht University in The Netherlands and was funded by the Netherlands Organization for Scientific Research (NWO-VENI-451-11-008). After the kick-off meeting the authors submitted their papers, all of which were reviewed by experts in the field. The papers in the eBook are listed in alphabetical order, but in the editorial the papers are introduced thematically. Although it is impossible to cover all areas of relevant research in the field of MI, papers in this eBook provide insight on important aspects of measurement invariance. We hope that the discussions included in this special issue will stimulate further research on MI and facilitate further discussions to support the understanding of the role of MI in multi-item surveys. Why the United States lags behind other industrialized countries in sharing the benefits of innovation with workers and how we can remedy the problem. The United States has too many low-quality, low-wage jobs. Every country has its share, but those in the United States are especially poorly paid and often without benefits. Meanwhile, overall productivity increases steadily and new technology has transformed large parts of the economy, enhancing the skills and paychecks of higher paid knowledge workers. What 's wrong with this picture? Why have so many workers benefited so little from decades of growth? The Work of the Future shows that technology is neither the problem nor the solution. We can build better jobs if we create institutions that leverage technological innovation and also support workers through long cycles of technological transformation. Building on findings from the multiyear MIT Task Force on the Work of the Future, the book argues that we must

foster institutional innovations that complement technological change. Skills programs that emphasize work-based and hybrid learning (in person and online), for example, empower workers to become and remain productive in a continuously evolving workplace. Industries fueled by new technology that augments workers can supply good jobs, and federal investment in R&D can help make these industries worker-friendly. We must act to ensure that the labor market of the future offers benefits, opportunity, and a measure of economic security to all.

An affecting memoir from one of America's most provocative humorists Over the past two decades, Joe Queenan has established himself as a scourge of everything that is

half-baked, half-witted, and halfhearted in American culture. In *Closing Time*, Queenan turns his sights on a more serious and a more personal topic: his childhood in a Philadelphia housing project in the early 1960s. By turns hilarious and heartbreaking, *Closing Time* recounts Queenan's Irish Catholic upbringing in a family dominated by his erratic, alcoholic father, and his long flight away from the dismal confines of his neighborhood into the greater, wide world. A story about salvation and escape, *Closing Time* has at its heart the makings of a classic American autobiography.
