The North Nugget is a good option for a beginner in flattish and light wind conditions. If, on the other hand, your local spot has strong (18+ knots) onshore winds and waves up to 1.5-2m, you may prefer a thinner board with a bit of rocker and a couple inches shorter than you, that can cut through chop and waves.

The electromagnetic spectrum includes a wide range of light waves, some that we can't see. Some of the non-visible types of waves are radio waves, microwaves, infrared rays, and X-rays. These types of waves have all sorts of uses in science and technology. In the visible spectrum of light, the color of the light depends on the frequency.
