Start with a high quality recording and you will have to do less later on in the mixing process. This is where things get a little techy as the process of recording external signals into a computer means that you are converting analogue signals into digital ones, so a good analogue to digital converter is required.

“pilot” recording. Record draft lead vocals (if needed) Add the “rhythm section”. Record the harmonies. Re-record lead vocals (if needed) Add some “sweetening”.

### Recording Studio

#### Microphones: The

#### Ultimate Beginner's Guide

Audacity uses Windows audio defaults for recording and playback with few exceptions, so go down to your system tray, right-click your volume control, and go to “Recording Devices”. Make sure your microphone is set to be the default device. Then, in Audacity, just click the “Record” button up top.

When recording your music video, it’s always a good idea to think of how the main person in it is placed within the scene as a whole. This is known as composition (or “framing”), and depending on how you use it, can give a really different feel to your finished video.
