Are you thinking about adding a greenhouse to your garden? I fully support that idea! We have had our little greenhouse and it has become a cherished part of our homestead! It enables us to start a significantly larger amount of our food from seed than we ever had space for indoors. It has also become a special and strangely intimate space to spend time "outside" on rainy winter days. Truthfully, we love and use it far more than we ever anticipated! Benefits of using a greenhouse: Provides a protected place for seedlings and other tender plants. Extends the growing season. Allows you to grow tropical, rare, or other special plants. May allow you to garden year-round. Provides protection from many pests. As you contemplate your options, let me share what we've learned and experienced in using and maintaining a hobby greenhouse.

work with? This book covers the basics of understanding how to use Linux. We will use Ubuntu 14.04 LTS to learn multiple fundamentals in using Linux and later will go through the process of creating a web server. 80% of websites are driven by Linux servers. Understanding the basics and expanding upon this will provide great career opportunities and a great skill as well. We start simple and the reader does not need any prior knowledge. We will make baby steps and slowly work ourselves up to configuring the Ubuntu Server to be a functional web server. There will still be much to learn, but within a few hours you can have your own Linux server setup, understand the basics, and also have WordPress loaded into it. We cover installing packages, creating files in nano, LAMP stack, and try to do so in a practical way so that you can finish this guide with something to show off.
