As humans, we are drawn to predators like no other group of animals. They are the epitome of form and function, and have a level of perfection that we revere. In 2009, wildlife expert, conservationist and photographer David Plummer was diagnosed with Parkinson's disease. Rather than let it defeat him, he was galvanised to grab life by the horns and achieve the perfect wildlife shot. Over the next seven years, he did much more than that. The result is this breathtaking collection of over 200 of his best and favourite photographs of exotic and wild animals in their natural habitats. To capture them, David travelled to some of the most remote and stunning locations across the world, from Africa to India to the Galápagos Islands and back to his native England. 7 Years of Camera Shake showcases seven years of immersive and illuminating photography: of predators on the prowl, of prey in the clutches of death, of the inexplicable synchronisation of nature, of the beautiful relationship between mother and child, and much, much more. Plummer's work has been featured in wildlife publications and national and international press, and now the work he has produced since his diagnosis is showcased here, accompanied by his thoughts and anecdotes on how he achieved each perfect shot.

Find Joy in the Beauty and Wonder of Birds Birding is among the most popular outdoor activities—especially in the Northeast, where hundreds of different bird species can be seen and observed. Now is the perfect time to join the fun and let our feathered friends astonish and inspire

you. Award-winning author, naturalist, and wildlife photographer Stan Tekiela has written best-selling bird identification guides for almost every Northeastern state. In Stan Tekiela's *Birding for Beginners: Northeast*, he provides the information you need to become a skilled birder in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont. The first section of the book presents "how to" information. Learn the basics of bird feeders. Get to know your birdseed. Create a bird-friendly yard—and even make your own bird food with do-it-yourself recipes. The book's second section is an identification guide, featuring 54 Northeastern birds that are most likely to be seen at your backyard feeder or near your home. The species are organized by color, making it simple to identify what you see. If you spot a yellow bird, go to the yellow section to discover what it is. Each bird gets a full-page photograph with notations about key field marks, or identification characteristics. The full-color photos are paired with information ranging from the bird's nest and eggs to favorite foods, as well as Stan's fascinating naturalist notes. Give birding a try, and get started with the guidance of an expert. You'll be amazed by how much joy birds can bring, and you'll have a lifetime to enjoy them.
