Open source software, also known as free software, now offers a
creative platform with world-class programs. Just ask the people
who have completed high-quality projects or developed popular web
2.0 sites using open source desktop applications. This phenomenon
is no longer underground or restricted to techies-there have been
more than 61 million downloads of the Audacity audio editor and
more than 60 million downloads of the GIMP for Windows photographic
tool from SourceForge.net alone. Crafting Digital Media is your
foundation course in photographic manipulation, illustration,
animation, 3D modelling, publishing, recording audio and making
music, DJ'ing, mixing and mastering audio CDs, video editing and
web content delivery. Every technique described in the book can be
achieved on GNU/Linux, but many of the applications covered run on
Windows and Mac OS X as well. New to GNU/Linux and a little
daunted? Don't worry-there's a step-by-step tutorial on Ubuntu for
either temporary use or permanent installation. If you are a
creative type who wants to get started with open source software or
an existing GNU/Linux user looking to explore this category of
programs, this is the book for you! Realize your own personal
projects and creative ambitions with the tools this book will place
at your fingertips.
