Demographic Audience Analysis. Demographics are broad sociocultural categories, such as age, gender, race, socioeconomic status, sexual orientation, education level, religion, ethnicity, and nationality that are used to segment a larger population. Since you are always going to have diverse demographics among your audience members, it would be unwise to focus solely on one group over another.

In common parlance, randomness is the apparent or actual lack of pattern or predictability in events. A random sequence of events, symbols or steps often has no order and does not follow an intelligible pattern or combination. Individual random events are, by definition, unpredictable, but if the probability distribution is known, the frequency of different outcomes over repeated events (or ...
