The Chemical Engineering Reference Manual provides a detailed review for engineers studying for the chemical PE exam, preparing them for what they will find on test day. It includes more than 160 solved example problems, 164 practice problems, and test-taking strategy. The chemical PE exam is an eight-hour, open-book test, consisting of 80 multiple-choice problems. It is administered every April and October. The Chemical Engineering Reference Manual is the primary text examinees need both to prepare for and to use during the exam. It reviews current exam topics and uses practice problems to emphasize key concepts. Supplementary products include the Solutions Manual for the practice problems and the Practice PE Exams.

STATISTICAL METHODS FOR PSYCHOLOGY surveys the statistical techniques commonly used in the behavioral and social sciences, particularly psychology and education. To help students gain a better understanding of the specific statistical hypothesis tests that are covered throughout the text, author David Howell emphasizes conceptual understanding. This Eighth Edition continues to focus students on two key themes that are the cornerstones of this book's success: the importance of looking at the data before beginning a hypothesis test, and the importance of knowing the relationship between the statistical test in use and the theoretical questions being asked by the experiment. New and expanded topics--reflecting the evolving realm of statistical methods--include effect size, meta-analysis, and treatment of missing data. Moody's Bank and Finance Manual

The new vol. 3 of the GAO and the President's Council on Integrity and Efficiency (PCIE) Financial Audit Manual (FAM). GAO and the PCIE issued the joint FAM in July 2001. The FAM presents a methodology to perform financial statement audits of fed. entities in accordance with professional standards. GAO has updated the FAM for significant changes that have occurred in auditing financial statements in the U.S. gov't since the last major

revisions to the FAM were issued in July 2004. These checklists are tools that may be used by entities and auditors to document conformity with U.S. generally accepted accounting principles (U.S. GAAP).
