Look-Alikes Jr. Routledge Back Page Once again with this story I want the reader to be able to relate to what kids feel and struggle with in life. I also want them curious about how real is God and His word. Maddy is clearly a leader in this series of books, but in this book at first she feels like a failure. As she sees her unfaithfulness in obeying

God, she discovers God is still faithful to her. She has learned something new about God that will impact her the rest of her life—a new side of His love when she discovers God even loves her on her very bad days. This will allow Maddy to always run to God no matter how she feels, knowing He will always be there. This book will speak to our children's hearts and minds the same way God speaks to us, as we are all learning to come to him as little children.

Intended as the primary text for introductory courses on medical anthropology, this book integrates human biological data relevant to health and disease with both evolutionary theory and the social environments that more often than not produce major challenges to health and survival.

Because students who take this fastest-growing anthropology course come from a variety of disciplines (anthropology, biology, especially pre-med students, and health sciences, especially), the

text does not assume anything beyond a basic high-school level familiarity with human biology and anthropology. The authors first present basic biological information on a particular health condition and then expand their analysis to include evolutionary, historical, and cross-cultural perspectives.

Among the topics covered are nutrition, infectious disease, stress, reproductive health, behavioral disease, aging, race/racism and health, mental health, and healers and healing.
