Generously supported by previously unseen illustrations, the author's story, from his position as designer to Chief Stylist, pulls back the curtain concealing an idiosyncratic institution, motivated as much by pride as the bottom-line.

What began as a solution for transportation has evolved into a desire for speed, luxury, personal expression, and freedom. For many, the thrill of the drive has eclipsed the pure utility of the automobile. And the pursuit of

that thrill is the driving force behind *365 Cars You Must Drive*. From the Ford Model T to the Porsche Carrera GT, there are certain cars that any self-respecting auto enthusiast just has to know—and experience from the driver's seat. With homage to the greatest cars and good-natured mockery of the strangest, authors Matt Stone and John Matras detail which cars to drive and why, how to get behind the wheel, where to drive them, and who to invite along for the ride. Each entry contains a colorful spec box noting the car's claim to fame, a Did You Know? factoid, the author's clever suggestions for "The Perfect Passenger" and the "Soundtrack" coming out of the speakers, Behind the Wheel notes, and a "Perfect Drive" for the marque or model covered. Engine details, production information, the price when it debuted and the collectible price now - all of it adds up to at-a-glance fun reading to go with informative essays on each car, archival and full-color photos, and more. What came before 'postmodernism' in historical studies? By thinking through the assumptions, methods and cast of mind of English historians writing between about 1870 and 1970, this book reveals the intellectual world of the modernists and offers a full analysis of English historiography in this crucial period. Modernist historiography set itself the objective of going beyond the colourful narratives of 'whigs' and 'popularizers' in order to establish history as the queen of the humanities and as a rival to the sciences as a vehicle of knowledge. Professor Bentley does not follow those who deride modernism as 'positivist' or 'empiricist' but

instead shows how it set in train brilliant new styles of investigation that transformed how historians understood the English past. But he shows how these strengths were eventually outweighed by inherent confusions and misapprehensions that threatened to kill the very subject that the modernists had intended to sustain.

After Ford unsuccessfully attempted to buy Ferrari, in 1963, the American car giant instead embarked on its own racing programme in a bid to beat the famous Italian marque at the world's most prestigious race, the Le Mans 24 Hours, as told in the forthcoming Hollywood movie *Ford v. Ferrari*. This updated edition of *The Ford that Beat Ferrari* tells the story of how that mission was eventually accomplished. Development of the GT40: how the prototype Ford GT emerged in 1964 from the previous year's Lola GT programme. The works teams and the GT40: the car's racing exploits in its earlier years, first with Ford Advanced

Vehicles (1964), then Shelby American (1965) and Alan Mann Racing (1966). The big ones: this section of the book covers the GT40's evolution into the 7-litre monsters that brought enormous success, including the first two Le Mans victories with the Mark II (1966) and Mark IV (1967), before becoming outlawed by new restrictions on engine size. The Gulf years: against all expectations, the venerable GT40, now back to 5-litre power, raced on with John Wyer's crack JW Automotive Engineering outfit in the iconic blue and orange colours of Gulf, successes including two further Le Mans wins (1968 and 1969). The production line racer: the stories of the 68 privateers, big and small, who raced GT40s. Chassis and drivers: a data section giving resumés of type designations, chassis histories and all drivers who raced GT40s. The magic lives on: the book's concluding sections show surviving cars at differing stages in their later life and bring the story up to date with developments since the 2005 edition.

The introduction of the Porsche 901 in 1963 marked a milestone in automotive history. Although the name later had to be changed because Peugeot had patented having a 0 in the middle of car model numbers, the 911 didn't let anything stand in the way of its becoming an iconic sports car. This success story spans all the way from the 901 and the Carrera RS 2.7 (which with its characteristic rear spoiler--the so-called "ducktail"--was the fastest production car of its time) right up to the current generation of the 991. For the 50th birthday of the populous 911 family, the famous automotive photographer Rene Staud, whose The Mercedes-Benz 300 SL Book has also been

published by teNeues, showcases the most important models--all in his typically radiant and distinctive style.

'The fastest lorries in Europe', the Italian carmaker Ettore Bugatti laconically described Walter Bentley's huge, snarling British race cars that aggressively dominated motor racing for years. Driven by hard-partying young men known as the Bentley Boys, they consistently beat all comers, winning the Le Mans 24 Hour endurance race five years out of six. They also dominated Brooklands - the cradle of motor racing - and its thundering, steep banking, becoming the world's most admired and feared sporting cars. Bought by Rolls-Royce in 1931, Bentley languished in semiobscurity for decades as their parent company concentrated on its main marque. In the 1980s Bentley re-emerged with mighty turbo-charged super cars, and saved the financially ailing Rolls-Royce from going under. Bentley was back, and today is the world's leading performance luxury car.

Over multiple editions, this transformative text has taught the lively art of rhetorical criticism to thousands of students at more than 300 colleges and universities. Insights from classroom use enrich each new edition. With an unparalleled talent for distilling sophisticated rhetorical concepts and processes, Sonja Foss highlights ten methods of doing rhetorical criticism—the systematic investigation and explanation of symbolic acts and artifacts. Each chapter focuses on one method, its foundational theories, and the steps necessary to perform an analysis using that method. Foss provides instructions on how to write coherent, well-argued reports of analytical findings, which are then illustrated by sample essays. A chapter on feminist criticism features the disruption of conventional ideologies and practices. Storytelling in the digital world is a timely addition to the chapter on narrative criticism. Student essays now include analyses of the same artifact using multiple methods. A deep understanding of rhetorical criticism equips readers to become engaged and active participants in shaping the nature of the worlds in which we live.
