Daimler-Benz 600-Series

Aircraft Engines

As Germany began its rearmament campaign in the 1930s, high-performance marine diesel engines were needed to power various motorboats. The Kriegsmarine (German Navy) turned to Mercedes-Benz to supply a series of high-speed diesel engines. These engines were part of the MB 500 series of engines that were based on the Daimler-Benz DB 602 (LOF-2) engine developed to power the LZ 129

Hindenburg ...

Daimler-Benz DB 601 - Aviation History
The Daimler-Benz DB 605 is a German aircraft engine, built during World War II. Developed from the DB 601, the DB 605 was used from 1942 to 1945 in the Messerschmitt Bf 109 fighter, and the Bf 110 and Me 210C heavy

fighters. The DB 610, a coupled "power system" powerplant comprising a pair of side-by-side configured examples of the DB 605, geared together in the front to turn a single output ...

MERCEDES-BENZ 601 - Top prices

At Daimler-Benz, efforts to increase the power of the V-12 Mercedes engine proceeded along two lines — first, by improving aspects of the basic 33 L (2,070 in³) engine to produce the db601E and second, by increasing the capacity of the motor (in addition to the improvements) which resulted in the D 605A model of 35.8 L (2,180 in³).

The OM 601 by
Mercedes-Benz is a four
cylinder - diesel engine
with indirect injection,
the 1983 mid-size model
190 D was introduced.
The inline engine is
technically closely
related to the five- and
six-cylinder derivatives
OM 602 and OM 603, the
u. a. also in the series

W124 (predecessor of today's E-class) were used.
