Now a major film starring Jon Hamm, this is the wonderful story of two young Indians who became pro baseball pitchers. JB Bernstein seemed to have it all. One of the top sports agents in the US, he worked hard and enjoyed the bachelor lifestyle to the full. But he hankered for more, and when he set himself a challenge - to unearth someone in India capable of becoming a pro baseball pitcher - most people thought he was mad and doomed to face a costly and public failure. The reality show Million Dollar Arm brought thousands of contestants hoping for a shot at glory, but eventually they unearthed two candidates: Rinku and Dinesh. Bernstein brought them back to the US, put them up in his home and helped them to get used to a very different world, while they also worked hard to learn the game that was second nature to most American sportsmen. Finally, they got their chance and - against all the odds - they were both awarded pro contracts. This heartwarming story has now been made into a film starring Jon Hamm (Mad Men) and Suraj Sharma (The Life of Pi). A true-life version of Slumdog Millionaire meets Jerry Maguire, Million Dollar Arm shows what can happen when you dream big.

Supervision of Police Personnel Penguin

As I begin to write this Preface, I feel a rush of excitement. I have now finished the book; my gestalt is coming into completion. Throughout the months that I have been writing this, I have, indeed, been intrinsically motivated. Now that it is finished I feel quite competent and self-determining (see Chapter 2). Whether or not those who read the book will perceive me that way is also a concern of mine (an extrinsic one), but it is a wholly separate issue from the intrinsic rewards I have been experiencing. This book presents a theoretical perspective. It reviews an enormous amount of research which establishes unequivocally that intrinsic motivation exists. Also considered herein are various approaches to the conceptualizing of intrinsic motivation. The book concentrates on the approach which has developed out of the work of Robert White (1959), namely, that intrinsically motivated behaviors are ones which a person engages in so that he may feel competent and self-determining in relation to his environment. The book then considers the development of intrinsic motivation, how behaviors are motivated intrinsically, how they relate to and how intrinsic motivation is extrinsically motivated behaviors, affected by extrinsic rewards and controls. It also considers how changes in intrinsic motivation relate to changes in attitudes, how people attribute motivation to each other, how the attribution process is motivated, and how the process of perceiving motivation (and other internal states) in oneself relates to perceiving them in others.

Most new psychology instructors enter their first undergraduate classrooms with little or no formal preparation for their role as a teacher. The goal of this book is to review the body of teaching research that is available as well as some of the well-accepted lore, so as to make the first foray into teaching psychology a positive experience. Teaching Psychology outlines the major problems and issues confronting psychology teachers. It presents an overview of the "nuts and bolts" of teaching psychology including dealing with troubled and troubling students, choosing and using technology, developing evaluation instruments, and selecting methods for self-evaluation. Written by two award-winning psychology professors with over 50 years of combined teaching experience, the book offers a wide range of down-to-earth suggestions and immediately usable materials intended to help psychology teachers teach better and help students learn more. The chapters are organized to roughly parallel the sequence of tasks that new psychology teachers face, beginning with goal setting and ending with evaluation of one's teaching. Each chapter is chockfull of helpful tools including checklists, sample lecture notes, writing assignments, and grading criteria. To make it easier to customize this material, these tools are available on an accompanying CD along with a rating sheet for choosing a textbook, a student grade-record sheet, a sample statement on academic integrity and a pool of less-than-perfect test items to hone item-writing skills. This book offers guidelines for teaching such as: setting goals in line with 10 basic principles of effective teaching planning the basics including choosing a text, writing a syllabus, and creating a grading system setting a positive tone in the classroom providing tips on asking and answering questions, promoting critical thinking, and evaluating student performance.
