The Soft Edge is a one-of-a-kind history of the information revolution. In his lucid and direct style, Paul Levinson, historian and philosopher of media and communications, gives us more than just a history of information technologies. *The Soft Edge* is a book about theories on the evolution of technology, the effects that human choice has on this (r)evolution, and what's in store for us in the future. Paul Levinson's engaging voice guides us on a tour that explains how communications media have been responsible for major developments in history and for profound changes in our day-to-day lives. Levinson presents the intriguing argument that technology actually becomes more human. We see how information technologies are selected on the basis of how well they meet human needs. Why is email more like speech than print is? Why didn't the arrival of television destroy the radio? These and many more thought provoking questions are answered in *The Soft Edge*. Boldly extending and deepening the pathways blazed by

McLuhan, Paul Levinson has provided us with a brilliant and exciting study of life with our old media, our new media, and the media still to come.

At a gala event in downtown Dallas, lawyer Sharon Hays runs into an old friend turned Hollywood star who is in town promoting her most recent film with her current lover—a Hollywood bad boy. But when a brutally murdered corpse is discovered in her posh hotel suite, the starlet finds herself accused of the crime. Sharon is all too eager to take up her friend's defense, but the facts of what happened that night in the hotel room are far from clear. Sharon's friend claims she never went back to the room, and her lover had supposedly blacked out. Soon Sharon finds herself in the media spotlight defending America's sweetheart.

Start Your Own Hair Salon and Day Spa Doubleday Books

The Answer Machine is a practical, non-technical guide to the technologies behind information seeking and analysis. It introduces search and content analytics to software buyers, knowledge managers, and searchers who want to understand and design effective online environments. The book describes how search evolved from an expert-only to an end user tool. It provides an overview of search engines, categorization and clustering, natural language processing, content analytics, and visualization technologies. Detailed profiles for Web search, eCommerce search, eDiscovery, and enterprise search contrast the types of users, uses, tasks, technologies, and interaction designs for each. These variables shape each application, although the underlying technologies are the same. Types of information tasks and the trade-offs between precision and recall, time, volume and precision, and privacy vs. personalization are discussed within this context. The book examines trends toward convenient, context-aware computing, big data and analytics technologies, conversational systems, and answer machines. The Answer Machine explores IBM Watson's DeepQA technology and describes how it is used to answer health care and Jeopardy questions. The book concludes by discussing the implications of these advances: how they will change the way we run our businesses, practice medicine, govern, or conduct our lives in the digital age. Table of Contents: Introduction / The Query Process and Barriers to Finding Information Online / Online Search: An Evolution / Search and Discovery Technologies: An Overview / Information Access: A Spectrum of Needs and Uses / Future Tense: The Next Era in Information Access and Discovery / Answer Machines

How to Start a Home-Based Children's Birthday Party Business Rowman & Littlefield

New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.
