Created by the expert hosts of the popular Well-Fed Women Podcast, a step-by-step food and fitness plan for women, that teaches them how to improve their health by changing the quality—not the quantity—of the food they eat. To eat your way to better health, you don't need to limit your calorie intake, or cut out carbs or fat. You don't need to count "points." Better health doesn't come from limits. It comes from focusing on the quality of food that you eat—not the quantity. Instead of limiting your food intake you should be enriching it, argue Noelle Tarr and Stefani Ruper. The popular hosts of the Well-Fed Women Podcast want you to focus on the good things you eat. They want to make sure you get enough food so that your body has the fuel and nourishment it needs to support a healthy, long, and energetic life. Noelle and Stefani know about eating for health firsthand. They, too, struggled with confusing and frustrating medical conditions, including infertility, digestive issues, acne, polycystic ovarian syndrome, hypothyroidism, and anemia. They discovered that the secret to improving wellness was actually more food: they ditched the diet books, calorie counters, and scales, and started eating their way to health. In *Coconuts and Kettlebells*, you'll eat at least 2,000 calories a day thanks to a delicious selection of dishes that are all gluten-free, grain-free, and paleo. Within those 2,000 calories, setting a minimum intakes of protein, fat, and carbohydrates instead of the usual maximums will ensure that your diet is full of nutrients, while also providing flexibility to enjoy what you're eating. Noelle and Stefani identify the Big Four foods—grains, dairy, vegetable oils, and refined sugar—that cause the most health problems among women. While many diets require you to eliminate these foods entirely, *Coconuts and Kettlebells* provides an easy-to-follow step-by-step program to test these foods and determine which you need to cut back on—and which you don't—to feel better. To help you discover how your body responds to the Big Four, you'll choose from two simple 4-week meal plans: one for the Butter Lover (people who tend to feel more satisfied eating higher ratios of fats) and one for the Bread Lover (people who tend to feel more satisfied eating higher ratios of carbs). Each meal plan comes with a weekly shopping list, a guide to kitchen tools and equipment, and instructions on how to batch cook, meal prep, and stock the pantry. In addition, you'll have access to over 75 gluten-free and paleo-friendly flavor-packed recipes (free of the Big Four foods) for every meal of the day, including: Coconut Chai Latte Kale and Bacon Breakfast Skillet Apple Pie Smoothie Thai Coconut Curry Shrimp Moroccan Lamb Meatballs Shrimp and Cabbage Stir Fry Parsnip and Carrot Fries Mango Jalapeno Salsa Chocolate Cherry Energy Bites Lemon Raspberry Mini Cheesecakes To go along with the meal plans, Noelle and Stefani also provide three 4-week fitness plans tailored to three experience levels: beginner, intermediate, and advanced. All of the workouts can be done anywhere—at your home or on the road—and take no more than thirty minutes. A comprehensive whole body program to get and keep you healthy inside and out, *Coconuts and Kettlebells* provides the knowledge and tools you need to heal in a way that is effortless, rewarding, confidence-boosting, and everlasting. *Coconuts and Kettlebells* is illustrated with color photos throughout.

• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. . . . The public is hungry for this kind of practical wisdom." —David Roberts, *Vox* "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook." —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.
