Across a range of institutional settings, 'practitioners' and 'professionals' are eliciting and capturing spoken talk from 'clients' (Sarangi 1998), transcribing that talk, and later repurposing the transcripts in place of the original interaction. This Research Topic seeks both to shed light on this often overlooked institutional process, and to encourage further linguistic input into this area of professional practice. Transcription is almost always an institutional practice (Park & Bucholtz 2009), providing a written record of spoken interaction to be used by another party at a later date, in another setting or context. There are a number of underappreciated features and consequences of this transformational process, which we hope this Research Topic will expose and examine.

When Teaching Writing Gets Tough Princeton University Press

Writing instruction is a particular challenge because there is no singular, linear solution to teaching students to write well. This book approaches writing as a wicked problem that takes place in complicated contexts. Through both scholarly research and teacher reflection, it examines ELA classrooms and the experiences of writing teachers to identify approaches that have proven effective with adolescents. The book uses wickedity to frame the problems of teaching writing and offers context-specific solutions enacted by teachers. While it addresses the realities of standardized ways of teaching and assessing writing, the book also highlights the deep professional knowledge and practical strategies teachers bring to writing instruction in middle and high school classrooms. Chapters grapple with tensions between testing and authenticity, assessing writing in nuanced ways, and finding enjoyment in the work of teaching writing amid and alongside persistent complexities. Specific topics include students' writing process, revision, students as decision makers, multimodal writing, assessment and writer's notebooks, data-driven instruction, the high school-to-college transition, and teacher professional development. Book Features: Includes examples of how teachers approach specific challenges associated with teaching writing to adolescents, analyzing how and why their solutions proved effective. Focuses on students engaged in writing in classrooms, teachers implementing writing strategies, and professional learning. Offers a range of relevant voices on the topic of writing instruction with authors that include classroom teachers and scholars.

Student's writing skills are improving tremendously... Last year's fourth-graders started using the sandwich method mid-year and almost all of them scored in the highest possible category when they took the state's standardized English-language arts test just a few months later. Wells Central Schools, Wells Central is just one of numerous schools that attribute their success to Ardith Davis Cole's Better Answers process. Since 2002, her book Better Answers has offered teachers and school districts a powerful

alternative to test-prep workbooks. It presents a dramatically different instructional model that helps students construct thoughtful test responses, but it also prepares them for any task requiring thorough, cogent answers to questions and prompts -- both in and out of school. Now, with students tested more frequently than ever, and with teachers increasingly concerned about incorporating substantive test-taking skills into children's learning, Ardith Cole responds with a new updated and expanded edition of Better Answers. Informed by Ardith's ongoing work in classrooms where students struggle over constructed-response tasks, the new edition makes the Better Answers sandwich even easier to implement. The book has also been significantly reorganized, as well as expanded to include two new chapters, Understanding the Prompt and What to do When. Also included is a resource-packed CD-ROM that contains everything teachers need to support their lessons and is a great tool for staff development: lesson plans for text-based and self-based responses; power point slides, charts, and other visual supports; sets of sample texts with prompts; sample student responses; assessment forms; extensive bibliography of print and online resources. The Better Answers process is easy to grasp and uses a gradual-release instructional process that begins with teacher modeling, invites increasing amounts of student participation, and eventually moves students into independent response writing. The book clearly explains each element of the process and provides helpful activities, authentic classroom vignettes, and tips on how to handle typical stumbling blocks along the way.

Designing interesting problems and writing assignments is one of the chief tasks of all teachers, but it can be especially challenging to translate and apply learning theory, good teaching techniques, and writing assignments into STEM and other quantitative disciplines. Student Writing in the Quantitative Disciplines offers instructors in math-based disciplines meaningful approaches to making their coursework richer and more relevant for their students, as well as satisfying institutional imperatives for writing curricula. This important resource provides instructors with the hands-on skills needed to guide their students in writing well in quantitative courses at all levels of the college curriculum and to promote students' general cognitive and intellectual growth. Comprehensive in scope, the book includes: Ideas for using writing as a means of learning mathematical concepts Illustrative examples of effective writing activities and assignments in a number of different genres Assessment criteria and effective strategies for responding to students' writing Examples of ways to help students engage in peer review, revision, and resubmission of their written work "Those of us who spend our lives urging faculty in all disciplines to integrate more writing into their courses have wished for the day when someone like Patrick Bahls would step forward with a book like this one." Chris M. Anson, University Distinguished Professor and director, Campus Writing and Speaking Program, North Carolina State University "Written by a mathematician, this readable, theoretically sound book describes practical strategies for teachers in the quantitative sciences to assign and respond to students' writing. It also describes numerous approaches to writing that engage students in disciplinary learning, collaborative discovery, and effective communication." Art Young, Campbell Professor of English emeritus, Clemson University "Loaded with practical advice, this timely, important, and engaging book will be an invaluable resource for instructors wishing to bring the benefits of writing-to-learn to the quantitative disciplines. As a mathematician thoroughly grounded in writing-across-the-curriculum scholarship, Bahls brings humor, classroom experience, and pedagogical savvy to a mission he clearly loves improving the quality of student learning in math and science."
