In this edited volume, Jean Petrucelli brings together the work of talented clinicians and researchers steeped in working with eating disordered patients for the past 10 to 35 years. Eating disorders are about body-states and their relational meanings. The split of mindbody functioning is enacted in many arenas in the eating disordered patient's life. Concretely, a patient believes that disciplining or controlling his or her body is a means to psychic equilibrium and interpersonal effectiveness. The collected papers in *Body-States: Interpersonal and Relational Perspectives on the Treatment of Eating Disorders* elaborates the essential role of linking symptoms with their emotional and interpersonal meanings in the context of the therapy relationship so that eating disordered patients can find their way out and survive the unbearable. The contributors bridge the gaps in varied protocols for recovery, illustrating that, at its core, trust in the reliability of the humanness of the other is necessary for patients to develop, regain, or have - for the first time - a stable body. They illustrate how embodied experience must be cultivated in the patient/therapist relationship as a felt experience so patients can experience their bodies as their own, to be lived in and enjoyed, rather than as an 'other' to be managed. In this collection Petrucelli convincingly demonstrates how interpersonal and relational treatments address eating problems, body image and "problems in living." *Body States: Interpersonal and Relational Perspectives on the Treatment of Eating Disorders* will be essential reading for psychoanalysts, psychotherapists, psychologists, psychiatrists, social workers, and a wide range of professionals and lay readers who are interested in the topic and treatment of eating disorders.

• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the *Drawdown* book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." –Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of

practical wisdom." –David Roberts, *Vox* "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook." –Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Here's a drug-free, side effect-free solution to common stress and mood problems—developed by two physicians. Millions of Americans suffer from mood problems and stress-related issues including anxiety, depression, insomnia, and trauma-induced emotions and behaviors; and most would prefer not to take medication for their conditions due to troublesome side effects, withdrawal symptoms, and disappointing success rates. Drs. Richard P. Brown and Patricia L. Gerbarg provide a drug-free alternative that works through a range of simple breathing techniques drawn from yoga, Buddhist meditation, the Chinese practice of qigong, Orthodox Christian monks, and other sources. These methods have been scientifically shown to be effective in alleviating specific stress and mood challenges such as anxiety, insomnia, post-traumatic stress disorder, and many others. The authors explain how breathing practices activate communication pathways between the mind and the body, positively impacting the brain and calming the stress response.

**The Body Keeps the Score** Penguin Books

New York Times Bestseller Stop—and even reverse!—age-related weight gain and muscle loss with the first-ever weight-loss plan specifically designed to shrink your belly, extend your life, and create your healthiest self at mid-life and beyond. You don't have to gain weight as you age. That's the simple yet revolutionary promise of The Whole Body Reset, which uncovers why standard diet and exercise advice stops working for us as we approach midlife—and reveals how simple changes to the way we eat can halt, and even reverse, age-related weight gain and muscle loss. The Whole Body Reset presents stunning new evidence about the power of "protein timing" for people at midlife—research that blows away current government guidelines, refutes the myth of slowing metabolisms and "inevitable" weight gain, and changes the way people in their mid-forties and older should think about food. The Whole Body Reset explains in simple, inspiring terms exactly how our bodies change with age, and how eating to accommodate those changes can make us respond to exercise as if we were twenty to thirty years younger. Developed by AARP, tested by a panel of more than 100 AARP employees, and approved by an international board of doctors, nutritionists, and fitness experts, The Whole Body Reset doesn't use diet phases, eating windows, calorie restriction, or other trendy gimmicks. Its six simple secrets and scores of recipes are easy to follow, designed for real people living in the real world. A dining guide even shows how to follow this program in popular restaurants from McDonald's to Starbucks to Olive Garden. And best of all: It works!
