“Hypnotic....It is ever tempting to try to fathom his restless spirit and his determination to challenge fate.” —Janet Maslin, *New York Times*  
Werner Herzog (*Grizzly Man*) is one of the most revered and enigmatic filmmakers of our time, and Fitzcarraldo is one of his most honored and admired films. More than just Herzog’s journal of the making of the monumental, problematical motion picture, which involved, among other things, major cast changes and reshoots, and the hauling (without the use of special effects) of a 360-ton steamship over a mountain. *Conquest of the Useless* is a work of art unto itself, an Amazonian fever dream that emerged from the delirium of the jungle. With fascinating observations about crew and players—including Herzog’s lead, the somewhat demented internationally renowned star Klaus Kinski—and breathtaking insights into the filmmaking process that are uniquely Werner Herzog, *Conquest of the Useless* is an eye-opening look into the mind of a cinematic master.

According to the Centers for Disease Control and Prevention (CDC), 115 Americans die each day from an opioid overdose, which averages one death every 12.5 minutes. Between 1999 and 2016, the number of drug overdoses catapulted by 300 percent, with injection drug use increasing by 93 percent between 2004 and 2014 and opioid-related hospital admissions increasing by 58 percent over the past decade. And an inexorable sequela of the opioid epidemic is the spread of infectious diseases. To address these infectious disease consequences of the opioid crisis, a public workshop titled *Integrating Infectious Disease Considerations with Response to the Opioid Epidemic* was convened on March 12 and 13, 2018, by the National Academies of Sciences, Engineering, and Medicine. Participants discussed strategies to prevent and treat infections in people who inject drugs, especially ways to work efficiently though the existing public health and medical systems. This publication summarizes the presentations and discussions from the workshop.

The first science fiction course in the American academy was held in the early 1950s. In the sixty years since, science fiction has become a recognized and established literary genre with a significant and growing body of scholarship. *The Cambridge History of Science Fiction* is a landmark volume as the first authoritative history of the genre. Over forty contributors with diverse and complementary specialties present a history of science fiction across national and genre boundaries, and trace its intellectual and creative roots in the philosophical and fantastic narratives of the ancient past. Science fiction as a literary genre is the central focus of the volume, but fundamental to its story is its non-literary cultural manifestations and influence. Coverage thus includes transmedia manifestations as an integral part of the genre’s history, including not only short stories and novels, but also film, art, architecture, music, comics, and interactive media.

How students get the materials they need as opportunities for higher education expand but funding shrinks. From the top down, *Shadow Libraries* explores the institutions that shape the provision of educational materials, from the formal sector of universities and publishers to the broadly informal ones organized by faculty, copy shops, student unions, and students themselves. It looks at the history of policy battles over access to education in the post – World War II era and at the narrower versions that have played out in relation to research and textbooks, from library policies to book subsidies to, more recently, the several “open” publication models that have emerged in the higher education sector. From the bottom up, *Shadow Libraries* explores how, simply, students get the materials they need. It maps the ubiquitous practice of photocopying and what are—in many cases—the more marginal ones of buying books, visiting libraries, and downloading from unauthorized sources. It looks at the informal networks that emerge in many contexts to share materials, from face-to-face student networks to Facebook groups, and at the processes that lead to the consolidation of some of those efforts into more organized archives that circulate offline and sometimes online—the shadow libraries of the title. If Alexandra Elbakyan’s Sci-Hub is the largest of these efforts to date, the more characteristic part of her story is the prologue: the personal struggle to participate in global scientific and educational communities, and the recourse to a wide array of ad hoc strategies and networks when formal, authorized means are lacking. If Elbakyan’s story has struck a chord, it is in part because it brings this contradiction in the academic project into sharp relief—universalist in principle and unequal in practice. *Shadow Libraries* is a study of that tension in the digital era. This Open Access book is about the development of a common understanding of environmental citizenship. It conceptualizes and frames environmental citizenship taking an educational perspective. Organized in four complementary parts, the book first explains the political, economic and societal dimensions of the concept. Next, it examines environmental citizenship as a psychological concept with a specific focus on knowledge, values, beliefs and attitudes. It then explores environmental citizenship within the context of environmental education and education for sustainability. It elaborates responsible environmental behaviour, youth activism and education for sustainability through the lens of environmental citizenship. Finally, it discusses the concept within the context of different educational levels, such as primary and secondary education in formal and non-formal settings. Environmental citizenship is a key factor in sustainability, green and cycle economy, and low-carbon society, and an important aspect in addressing global environmental problems. It has been an influential concept in many different arenas such as economy, policy, philosophy, and organizational

marketing. In the field of education, the concept could be better exploited and established, however. Education and, especially, environmental discourses in science education have a great deal to contribute to the adoption and promotion of environmental citizenship.

Mia risked everything to walk away from a gilded cage in Sector Two, but grasping at freedom was only her first trial. With no protection in the sectors, every day is a struggle to stay alive. Her best hope now is a job working for the most dangerous gang in Sector Four—the O ’ Kanes. When a motorcycle accident leaves Derek Ford riding a desk at the O ’ Kane compound, the last thing he needs is a sexy new assistant upending his office and his life. Especially someone like Mia, who greets his growls and commands with smiles and a fierce independence. The friction between them generates an undeniable heat, and Mia’s stubborn refusal to let life beat her down stirs Ford’s darkest protective instincts. He has the power to take care of her, protect her not only from discomfort but from threats of her past...but first he’d have to claim her. And Mia will never be kept again.

This book provides empirical evidence from Kenya, Tanzania and Mozambique and from different production systems of the importance of livestock as an asset to women and their participation in livestock and livestock product markets. It explores the issues of intra-household income management and economic benefits of livestock markets to women, focusing on how types of markets, the types of products and women ’ s participation in markets influence their access to livestock income. The book further analyses the role of livestock ownership, especially women ’ s ownership of livestock, in influencing household food security though increasing household dietary diversity and food adequacy. Additional issues addressed include access to resources, information and financial services to enable women more effectively to participate in livestock production and marketing, and some of the factors that influence this access. Practical strategies for increasing women ’ s market participation and access to information and services are discussed. The book ends with recommendations on how to mainstream gender in livestock research and development if livestock are to serve as a pathway out of poverty for the poor and especially for women.

THE REPUBLIC Plato’s Republic is widely acknowledged as one of the most influential works in the history of philosophy. Presented in the form of a dialogue between Socrates and three different interlocutors, it is an inquiry into the notion of a perfect community and the ideal individual within it. During the conversation, other questions are raised: what is goodness; what is reality; what is knowledge; what is the purpose of education? With remarkable lucidity and deft use of allegory, Plato arrives at a depiction of a state bound by harmony and ruled by ‘philosopher kings’. THE REPUBLIC The Republic is a philosophical dialogue about the nature of justice and the order and character of the just city-state and the just individual. The dialogues, among Socrates and various Athenians and foreigners, discuss the meaning of justice and examine whether or not the just man is happier than the unjust man, by proposing a society ruled by philosopher-kings and the guardians. THE REPUBLIC In this intellectually and historically influential work of philosophy and political theory, Plato discusses the theory of forms, the immortality of the soul, and the roles of the philosopher and of poetry in society. For years, Jared has existed on the fringes of both Eden society and Dallas O'Kane's Sector Four gang. He travels between these worlds, protected by his money and power--money he earned selling his body, and power that comes from knowing secrets. He's untouchable—until he starts a new life gathering intelligence for the O'Kanes. Lili Fleming walked out of Sector Five with a gun, the bloodstained clothes on her back, and an icy determination to survive. She finds herself in a world where people live hard and love harder, and nothing's more terrifying than how much the O'Kanes wake her up, make her feel—especially Jared. Emotion is a risk he can't afford, and a complication she doesn't need. But neither can resist the lust simmering between them, and the sparks that could either melt the ice around both their hearts...or get them killed. Because the only thing more dangerous than loving an O'Kane is loving a spy.
