Factors affecting the formation of FWUCs in institution building for PIMD in Cambodia: Two case studies The Crowood Press

Cambodia adopted Participatory Irrigation Management and Development (PIMD) as a national policy quite recently in recognition of the need for community participation and ownership of irrigation schemes in order to improve the performance of irrigation systems to achieve operational sustainability and economic development. Under this program, the Royal Government of Cambodia is seeking to

devolve responsibility for all aspects of scheme operations to Farmer Water User Communities (FWUCs), which constitute the focal institutional mechanism of PIMD. Implementing PIMD in Cambodia under many existing unfavorable conditions including high levels of poverty, low agricultural productivity and deteriorated irrigation systems with frequently poor design is a very difficult and challenging task. This study carried out towards the end of 2004 in two irrigation schemes of contrasting socioeconomic and physical scenarios analyzes the factors that influence the formation of FWUCs under different physical, socioeconomic, legal and institutional conditions. In this analysis it was found that the favorable socioeconomic conditions, appropriateness of the strategies and the process followed and link with the local institutions were the key attributes for the formation of functional FWUCs in the implementation of PIMD.

Sex, Love, and Migration goes beyond a common narrative of women's exploitation as a feature of migration in the early twenty-first century, a story that features young women from poor countries who cross borders to work in low paid and often intimate labor. Alexia Bloch argues that the mobility of women is marked not only by risks but also by personal and social transformation as migration fundamentally reshapes women's emotional worlds and aspirations. Bloch documents how, as women have crossed borders between the former Soviet Union and Turkey since the early 1990s, they have forged new forms of intimacy in their households in Moldova, Ukraine, Belarus, and Russia, but also in Istanbul, where they often work for years on end. Sex, Love, and Migration takes as its subject the lives of post-Soviet migrant women employed in three distinct spheres—sex work, the garment trade, and domestic work. Bloch challenges us to decouple images of women on the move from simple assumptions about danger, victimization, and trafficking. She redirects our attention to the aspirations and lives of women who, despite myriad impediments, move between global capitalist centers and their home communities.

Everything you think you know about Nikola Tesla is wrong. Nikola Tesla was one of the greatest electrical inventors who ever lived. For years, the engineering genius was relegated to relative obscurity, his contributions to humanity (we are told) obscured by a number of nineteenth-century inventors and industrialists who took credit for his work or stole his patents outright. In recent years, the historical record has been "corrected" and Tesla has been restored to his rightful place among historical luminaries like Thomas Edison, George Westinghouse, and Guglielmo Marconi. Most biographies repeat the familiar account of Tesla's life, including his invention of alternating current, his falling out with Edison, how he lost billions in patent royalties to Westinghouse, and his fight to prove that Marconi stole 13 of his patents to "invent" radio. But, what really happened? Consider this: Everything you think you know about Nikola Tesla is wrong. Newly uncovered information proves that the popular account of Tesla's life is itself very flawed. In *The Truth About Tesla*, Christopher Cooper sets out to prove that the conventional story not only oversimplifies history, it denies credit to some of the true inventors behind many of the groundbreaking technologies now attributed to Tesla and perpetuates a misunderstanding about the process of innovation itself. Are you positive that Alexander Graham Bell invented the telephone? Are you sure the Wright Brothers were the first in flight? Think again! With a provocative foreword by Tesla biographer Marc. J. Seifer, *The Truth About Tesla* is one of the first books to set the record straight, tracing the origin of some of the greatest electrical inventions to a coterie of colorful characters that conventional history has all but forgotten.

We are entering a golden age of alternative investments. Alternative asset classes including private equity, hedge funds, catastrophe reinsurance, real assets, non-traditional credit, alternative risk premia, digital assets, collectibles, and other novel assets are now available to investors and their advisors in a way that they never have been before. The pursuit of diversification is not as straightforward as it once was — and the classic 60/40 portfolio may no longer be sufficient in helping investors achieve their most important financial goals. With the ever-present need for sustainable income and risk management, alternative assets are poised to play a more prominent role in investor portfolios. Phil Huber is the Chief Investment Officer for a multi-billion dollar wealth management firm and acts as your guide on a journey through the past, present, and future of alternative investments. In this groundbreaking tour de force, he provides detailed coverage across the spectrum of alternative assets: their risk and return characteristics, methods to gain exposure, and how to fit everything into a balanced portfolio. The three parts of *The Allocator's Edge* address: 1. Why the future may present challenges for traditional portfolios; why the adoption of alternatives has remained elusive for many allocators; and why the case for alternatives is more compelling than ever thanks to financial evolution and innovation. 2. A comprehensive survey of the asset classes and strategies that comprise the vast universe of alternative investments. 3. How to build durable and resilient portfolios that harness alternative assets; and how to sharpen the client communication skills needed to establish proper expectations and make the unfamiliar familiar. *The Allocator's Edge* is written with the practitioner in mind, providing financial advisors, institutional allocators, and other professional investors the confidence and courage needed to effectively understand, implement, and translate alternatives for their clients. Alternative investments are the allocator's edge for the portfolios of tomorrow — and this is the essential guide for advisors and investors looking to seize the opportunity.

Vintage and Classic Tractor Restoration is a complete guide to the subject, looking at how to initially purchase a tractor, through private means or at auction, and then how to restore it back to its former glory, as it would have looked when it left the factory. It is

even possible to preserve a classic tractor in its working condition, which has a unique appeal to some tractor collectors and in some ways is harder than a full restoration to undertake. Practical techniques have been amply illustrated throughout the book, ranging from the simple use of a lathe or milling machine to the making from scratch of various tools useful in restoration work. Rather than just replacing items such as carburettor, starter motor or dynamo, practical advice is given on how to test and rebuild these components back to full operation. Fifty-two practical picture spreads show techniques suitable for restorers of all levels of skill. Contents: Setting up the workshop and making specialist tools; Finding a tractor to restore; Engine and fuel; Electrical systems; Transmission and brakes; Wheels, tyres and steering; Hydraulics and the three-point linkage; Metalwork; Painting and finishing. Aimed at serious tractor enthusiasts and agricultural machinery engineers and fully illustrated with 1100 colour photographs.

For marine, boating, and climbing amateurs and professionals at all levels, splices--the strongest way of attaching or joining the end of a rope--are essential. Why? The book is supplemented by four-plus hours of excellent video instruction.

Throughout, every type of splice is shown by an expert climber and shipbuilder. Learn what to know before starting to splice, then build a solid understanding and competence of modern cordage, its construction, and its fiber materials. Friedl has over 35 years of sailing experience, including several Atlantic crossings, and is also a professional climber. He teaches seminars and workshops on modern splicing worldwide, and in 2006, Friedl made the modern soft shackle internationally known. Now, his much-anticipated book allows you, whether you are a hobbyist or a professional, to leverage splicing skills to become more self-reliant while making your maritime or climbing pursuits safer.
