The Story of the Jewish People John Wiley & Sons

A bestselling dystopian novel that tackles surveillance, privacy and the frightening intrusions

of technology in our lives—a “compulsively readable parable for the 21st century” (Vanity Fair). When Mae Holland is hired to work for the Circle, the world’s most powerful internet company, she feels she’s been given the opportunity of a lifetime. The Circle, run out of a sprawling California campus, links users’ personal emails, social media, banking, and purchasing with their universal operating system, resulting in one online identity and a new age of civility and transparency. As Mae tours the open-plan office spaces, the towering glass dining facilities, the cozy dorms for those who spend nights at work, she is thrilled with the

---

company's modernity and activity. There are parties that last through the night, there are famous musicians playing on the lawn, there are athletic activities and clubs and brunches, and even an aquarium of rare fish retrieved from the Marianas Trench by the CEO. Mae can't believe her luck, her great fortune to work for the most influential company in the world—even as life beyond the campus grows distant, even as a strange encounter with a colleague leaves her shaken, even as her role at the Circle becomes increasingly public. What begins as the captivating story of one woman's ambition and idealism soon becomes a heart-racing novel of suspense,

raising questions about memory, history, privacy, democracy, and the limits of human knowledge.

Based on in-depth interviews with more than 200 leading entrepreneurs, a lecturer at the Stanford Graduate School of Business identifies the six essential disciplines needed to transform your ideas into real-world successes. Each of us has the capacity to spot opportunities, invent products, and build businesses—even \$100 million businesses. How do some people turn ideas into enterprises that endure? Why do some people succeed when so many others fail? The Creator's Code unlocks the six essential skills that turn small notions into big companies. This landmark book is based on 200 interviews with today's leading entrepreneurs

including the founders of LinkedIn, Chipotle, eBay, Under Armour, Tesla Motors, SpaceX, Spanx, Airbnb, PayPal, Jetblue, Gilt Groupe, Theranos, and Dropbox. Over the course of five years, Amy Wilkinson conducted rigorous interviews and analyzed research across many different fields. From the creators of the companies ranging from Yelp to Chobani to Zipcar, she found that entrepreneurial success works in much the same way. Creators are not born with an innate ability to conceive and build \$100 million enterprises. They work at it. They all share fundamental skills that can be learned, practiced, and passed on. The Creator's Code reveals six skills that

---

make creators of all kinds of endeavors breakthrough. These skills aren't rare gifts or slim chance talents.

Entrepreneurship, Wilkinson demonstrates, is accessible to everyone.

A history of Judaism written in letters from historian Martin Gilbert to his acquaintance in India, who wants to learn more about her ancestry. At her ninetieth birthday celebration in New Delhi, “Auntie Fori” revealed to her longtime acquaintance, Sir Martin Gilbert, that she was not of Indian birth but actually Hungarian—and Jewish. She did not know what this Jewish identity involved, historically or spiritually, and asked him to enlighten her. In response, Sir Martin embarked on the series of letters that have been gathered to form this book, shaping each one as a concise, individually formed story. He presents Jewish

---

history as the narrative expression—the timeline—of the Jewish faith, and the faith as it is informed by the history. In Sir Martin's hands, these stories are rich in incident and achievement, starting with Adam and Eve through the Biblical and post-Biblical periods, to the long history of the Jews in the Diaspora, and ending with an unexpected visit to an outpost of Jewry in Anchorage, Alaska. Ranging through almost every country in the world—including China and India—he maintains a chronological structure, weaving in the history of other peoples and faiths, to give Auntie Fori, and us, a sense of the larger stage on which Jewish history has played out. "Compact, breezy, and thoroughly enjoyable . . . For those, like Auntie Fori, hoping to understand the Jewish past and present, this book is a treasure." —Booklist

search for wear and corrosion resistant materials one of the most important tasks of the next century. Since the surface of a material is the location where any interaction occurs, it is that there the hardest requirements on the material are imposed: to be wear resistant for tools and bearings; to be corrosion resistant for turbine blades and tubes in the petrochemical industry; to be antireflecting for solar cells; to be decorative for architectural panels and to combine several of these properties in other applications. Surface engineering is the general term that incorporates all the techniques by which a surface modification can be accomplished. These techniques include both coating and modification of the surface by ion implantation and laser beam melting. In recent years a continuously growing number of these techniques were developed to the extent that it became more and more difficult to maintain an overlook and to understand which of these highly differentiated techniques might be applied to resolve a given surface engineering problem. A similar development is also occurring for surface characterization techniques. This volume contains contributions from renowned scientists and engineers to the Eurocourse the aim of which was to inform about the various techniques

and to give a comprehensive survey of the latest development on this subject.
