what happened to Amelia Earhart? The International Group for Historic Aircraft Recovery (TIGHAR) has spent fifteen years searching for the famous lost pilot using everything from archival research and archaeological survey to side-scan sonar and the analysis of radio wave propagation. In this spellbinding book, four of TIGHAR's scholars offer tantalizing evidence that the First Lady of the Air and her navigator Fred Noonan landed on an uninhabited tropical island but perished before they could be rescued. Do they have Amelia's shoe? Parts of her airplane? Are her bones tucked away in a hospital in Fiji? Come join their fascinating expedition and examine the evidence for yourself! The new paperback edition brings the search up to the present, including tantalizing evidence of campfires and charred

bones found on remote Nikumaroro. Visit the Authors' Web page for more information.

Miles Davis's seminal recording, known as 'Birth of the Cool', is the starting point for this colorful,

multi-disciplinary journey through 1950s West Coast America. 1950s West Coast style exuded "cool"; from the smooth, hypnotic strains of a Miles Davis riff through Richard Neutra's elegant, modernist residences to the hard-edged paintings of Helen Lundeberg and Karl Benjamin. This illustrated volume casts a fresh eye on Fifties West Coast style with illuminating commentary from a variety of perspectives. Designed to echo the period it celebrates, this catalog explores modernist innovations in art, architecture, design, film and music. Prominent cultural critics write on an array of topics - Thomas Hine about the culture of cool; Elizabeth Smith on domestic aspects of the period's architecture; Francis Colpitt on hard-edged abstract painting; Dave Hickey on jazz, and Bruce Jenkins on the crossover between animation and experimental film. The result is a multi-faceted exploration of the 1950s West Coast.

commodity clusters as the hardware platform of choice for an increasing number of organizations. This exciting new book, *Parallel Programming in C with MPI and OpenMP* addresses the needs of students and professionals who want to learn how to design, analyze, implement, and benchmark parallel programs in C using MPI and/or OpenMP. It introduces a rock-solid design methodology with coverage of the most important MPI functions and OpenMP directives. It also demonstrates, through a wide range of examples, how to develop parallel programs that will execute efficiently on today's parallel platforms. Avionics Troubleshooting and Repair Simon and Schuster

The events of 11 September 2001 changed the world, and in particular the aviation community, forever. Since then, the terrorist threat continues to dominate international air travel and pose a real and present danger to airline passengers and aircrew across the globe. In line with this, expectations of renewed commitments to aircrew security training increased, however the practical reality of the standard of information and effective training often fell short. This book aims to help redress this problem. Intended to help flight crews' deal with the new complexities they face in the skies, it is designed to inform and

enlighten crewmembers on the issues posed by air rage and terrorist activities, using techniques for conflict resolution, assessment of threat, mental and physical preparation and post-incident considerations. The culmination of work accomplished from a lifetime of employment in aviation, security and training, the authors use a progressive approach to explain security issues from a flight crewmember's perspective. Using detailed studies of current airline security practice, verified by interviews with crewmembers worldwide, the book uncovers many of the shortcomings of international aviation security and presents plausible and innovative solutions to the problems crewmembers face. Having worked with aviation industry leaders, regulatory authorities, major airlines and flight training organizations, the authors provide a unique blend of guidance, useful to the development of security programs for crewmembers by airlines, corporations and air charter companies. Government agencies

you ' re not supposed to know. Things that you can never un-know. Things that will change the course of your life...and the fate of the ones you love. I found her in our living room, bleeding and close to death, but alive. Barely. Until morning stole her last breath. The media called her killer the “ Triangle Terror ” ... and then forgot about her. But I never forgot—my murdered sister, and an investigation that led to my own resurrection from the dead. Twenty-two years ago, on a cold February night, Landon Worthington lost his father for the last time. After an armed robbery gone wrong, evidence and witness testimony pointed a shaky finger at Dan Worthington—deadbeat dad and alcoholic husband. But before the dust could settle over the conviction, Landon ' s preteen sister, Alexis, is murdered in their home, plunging Landon ' s life into further despair. Two decades and a cold case later, Landon is dogged by guilt over their estranged relationship and decides to confront his incarcerated father about what really happened the night of the robbery. But the years of lies are hard to unravel. And the biggest question of all haunts him: How does everything tie into his sister ' s murder? And so begins Landon ' s journey to piece together the puzzle of secrets, lies, and truths that can free his father, avenge his sister, and perhaps save himself.
