The Biodiversity Conservation Handbook is designed to assist state and  
local policymakers who wish to "think globally and act locally" by  
developing a state or local biodiversity program. In addition to  
providing background on biodiversity generally and the importance of  
such programs at the state and local level, it looks at how science can  
inform and be incorporated into biodiversity programs, the various  
legal tools states can use in implementing such programs, and the  
importance of ...
