Philosophy Here and Now
Oxford University Press, USA
Margaret Pabst Battin has established a reputation as

one of the top philosophers working in bioethics today. This work is a sequel to Battin's 1994 volume *The Least Worst Death*. The last ten years have seen fast-moving developments in end-of-life issues, from the legalization of physician-assisted suicide in Oregon and the Netherlands to furor over proposed restrictions of scheduled drugs used for causing death,

and the development of "NuTech" methods of assistance in dying. Battin's new collection covers a remarkably wide range of end-of-life topics, including suicide prevention, AIDS, suicide bombing, serpent-handling and other religious practices that pose a risk of death, genetic prognostication, suicide in old age, global justice and the "duty to die," and suicide, ph

physician-assisted suicide, and euthanasia, in both American and international contexts. As with the earlier volume, these new essays are theoretically adroit but draw richly from historical sources, fictional techniques, and ample factual material.

unique approach to teaching argumentation, editors David Boonin and Graham Oddie open each chapter with an influential article that takes a strong stand on a particular issue; the essays that immediately follow offer objections and critical responses to the arguments put forth in the featured selection.
