12. intrinsic heartbeat the heart 's own built-in mechanism for initiating a regular heartbeat, due to SA node 13. lacteal inside villi, this is where fats enter the lymphatic system 14.

Biology 12 - The Heart & Circulatory System

Stumped by systole? Dazed by diastole? Confused by the cardiac cycle? This dynamic music video explains how the circulatory system works in a clear and easy to understand way. See how the heart ...

biology 12 circulatory system Flashcards - Quizlet

The heart receives oxygen-deficient blood (see the white arrows) from the body into the right upper atrium. When the

heart contracts, the right lower ventricle will pump the blood into the lungs, where the carbon dioxide is exchanged for oxygen.

After the exchange, the blood containing fresh oxygen flows into the left upper atrium.
