content especially visually across relevant to students outside of the United States. The Tenth Edition of the best-selling text Campbell BIOLOGY helps launch students to success in biology through its clear and engaging narrative, superior pedagogy, and innovative use of art and photos to promote student learning. The Tenth Edition helps students develop a deeper understanding of biology by making connections

chapters and building the scientific skills needed for success in upper-level courses. New Make Connections Figures pull together content from different chapters visually, helping students see big picture relationships. New Scientific Skills Exercises in every chapter use real data to build key skills needed for biology, including data analysis, graphing, experimental design, and math skills. New

examples show students how our ability to sequence DNA and proteins rapidly and inexpensively is transforming every subfield of biology. Mastering brings learning full circle and is the most effective and widely used online homework, tutorial, and assessment system for the sciences. Over three million science students are currently using Mastering for the following features: \* Before class,

practical guide for UK practitioner s and those managing UK firms on the day-to-day legal issues that arise in the specialist field of partnerships and LLPs. The book is written by three authors: a leading partnership and LLP barrister with many years of litigation experience, a solicitor with

---

specialist expertise in partnership and LLP structures and agreements, and a respected academic in the field. It provides clear and practical guidance on the main issues that arise time and again in UK partnerships and LLPs. While there are many important differences between traditional partnerships and LLPs, the practical issues that they face are often similar, and the book therefore tackle both areas. The focus is mainly on those areas that regularly cause difficulty in firms (be they traditional partnership or LLP). Subjects covered include: the legal nature and characteristics of partnerships and LLPs \* factors influencing choice of legal entity \* the essential elements of partnership and members' agreements \* management structures including management boards and partnership councils \* conduct of meetings \* partnership/LLP property and profits and losses \* accounts,

chapter that introduces students to science as a way of knowing nature. A new feature highlights examples of the process of science throughout the book, and each chapter contains a process of science question that encourages students to experience science. Media activities allow additional practice with experimentation and analysis of data, and interviews with various researchers humanize science as a social activity.
