The Science of Life: Biology Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials for each semester

are independent of one another to allow flexibility. Semester 1: Intro to Science Have you ever wondered about human fossils, "cave men," skin color, "ape-men," or why missing links are still missing? Want to discover when T. Rex was small enough to fit in your hand? Or how old dinosaur fossils are-and how we know the age of these bones? Learn how the Bible's world view (not evolution's) unites evidence from science and history into a solid creation foundation for understanding the origin, history, and destiny of life-including yours! In Building Blocks in Science, Gary Parker explores some of the most interesting areas of science: fossils, the errors of evolution, the evidences for creation, all about early man and human origins, dinosaurs, and even "races." Learn how scientists use evidence in the present, how historians use evidence of the past, and discover the biblical world view, not evolution, that puts the two together in a credible and scientifically-sound way! Semester 2: Life Science Study clear biological answers for how science and Scripture fit together to honor the Creator. Have you ever wondered about such captivating topics as genetics, the roll of natural selection, embryonic development, or DNA and the magnificent origins of life? Within Building Blocks in Life Science you will discover exceptional insights and clarity to patterns of order in living things, including the promise of healing and new birth in Christ. Study numerous ways to refute the evolutionary worldview that life simply evolved by chance over millions of years. The evolutionary worldview can be found filtered through every topic at every age-level in our society. It has become the overwhelmingly accepted paradigm for the origins of life as taught in all secular institutions. This dynamic education resource helps young people not only learn science from a biblical perspective, but also helps them know how to defend their faith in the process. [Modeling Differential Equations in Biology](#) Penguin Group USA

Based on a very successful one-semester course taught at Harvard, this text teaches students in the life sciences how to use differential equations to help their research. It needs only a semester's background in calculus. Ideas from linear algebra and partial differential equations that are most useful to the life sciences are introduced as needed, and in the context of life science

applications, are drawn from real, published papers. It also teaches students how to recognize when differential equations can help focus research. A course taught with this book can replace the standard course in multivariable calculus that is more usually suited to engineers and physicists.

Social media star and comedian Josh Sundquist takes readers on his hilarious journey to the fringes of viral stardom to discover if it's possible to be both very famous and very happy. As a semi-famous internet creator, Josh Sundquist knows what it's like to chase fame, but he also knows that more fame usually means more stress. So he set out on a pseudo-scientific investigation to find out if there is any way for fame and happiness to overlap. He attempts to define the word "fame"—hint: it's harder than you'd think. He turns back time to identify the first facially-recognizable celebrity (you might know his former BFF Brutus). He digs into the numbers to debunk urban legends associated with stardom (ever heard of the 27 Club?). He talks to other semi-famous people (from K-pop sensations to former child stars) and asks them: Is this fame thing making you happy? If not, why are you doing it? If so, what's your secret? All while recounting funny stories about his own cringy fame-seeking (like his many attempts, and failures, to get onto MTV). Packed with playful diagrams, fascinating insights from celebrities, and embarrassing truths from Josh's experience with semi-fame, this is a must-read for anyone who has ever dreamed of becoming famous...or at least going viral on TikTok.
