2020 Edition Our CLEP study guides are different! The College Composition CLEP study guide TEACHES you what you need to know to pass the CLEP test. This study guide is more than just pages of sample test questions. Our easy to understand study guide will TEACH you the information. We've condensed what you need to know into a manageable book - one that will leave you completely prepared to tackle the test. This study guide includes sample test questions that will test your knowledge AND teach you new material. Your College Composition CLEP study guide also includes flashcards that are bound into the back of the book. Use these to memorize key concepts and terms. Anyone can take and pass a CLEP test. What are you waiting for? \*\*\*\*Testimonials\*\*\*\*I just wanted to drop you guys a line and tell you that I passed my final CLEP exam last Monday which gives me all of the credits I need to graduate. I have taken 30 credits worth of CLEP exams and I've passed them all by using your study guides. I actually purchased one of your study guides and failed my first test. I didn't fail because of your guide though, I failed because I didn't manage my time effectively and I ran short. I looked at your study guide after failing though, and a lot of the information on your study guide was very relevant to what was on the test. So, I tried again with a different test and a different study guide of yours. I passed. This pattern continues for 30 credits. I graduate on June 9th thanks to you guys, so I wanted to say thank you. The guides were worth every penny. Thanks, -John S.\*\*\*\*I would like to thank you for your study guides. I will be graduating in December with two bachelor degrees and CLEP helped me get there quickly. I gained 36 credits through CLEP and your study guides helped me through almost all of them. I can honestly say that I would not have passed many of the tests without your guides. Great products. Thanks!! -Erin W.\*\*\*\*

CLEP Biology best seller! Guaranteed higher score! We've helped thousands of students improve their scores This book provides over 1,500 biology practice questions that test your knowledge of all Biology topics covered in an undergraduate biology course and tested on CLEP. These questions and detailed explanations will help you to: - master important biology concepts - assess your knowledge of different Biology topics - improve your test-taking skills - prepare for CLEP Biology comprehensively and cost effectively CLEP Biology 1,500+ Practice Questions by Sterling Test Prep is comprised of all Biology topics tested on CLEP Biology. Scoring well on College-Level Examination Program (CLEP) Biology is important for your ability to bypass taking the class and earn college credit. To achieve a high score, you need to develop skills to properly apply the knowledge you have and quickly choose the correct answer. You must solve numerous practice questions that represent the style and content of CLEP questions. Understanding key science concepts is more valuable than memorizing terms. The explanations discuss why the answer is correct and — more importantly — why another answer that may have seemed correct is the wrong choice. These explanations include the foundations and details of important science topics needed to answer related questions on CLEP Biology. By reading these explanations carefully and understanding how they apply to solving the question, you will learn important biology concepts and the relationships between them. This will prepare you for the test and will significantly improve your score. All the questions are prepared by our science editors that possess extensive credentials, are educated in top colleges and universities. Our editors are experts on teaching sciences, preparing students for standardized science tests and have coached thousands of undergraduate and graduate school applicants on admission strategies. Cellular and Molecular Biology questions: eukaryotic cell: structure and function; molecular biology of eukaryotes, cellular metabolism and enzymes, specialized cells and tissues; microbiology; photosynthesis. Ecology: energy flow, nutrient cycles, ecosystems, biomes; populations, communities, conservation biology. Genetics: DNA and protein synthesis; genetics. Organismal Biology: plants: structure, function, reproduction; endocrine, nervous, circulatory, lymphatic, immune, digestive, excretory, muscle, skeletal systems, respiratory, skin, reproductive systems; development; animal behavior. Evolution: evolution, natural selection, classification, diversity.
