"Not so long ago, most of the globe was uncharted wilderness. The explorations of the world's deep jungles, vast deserts, stark badlands, frozen polar regions, and countless chains of islands are some of the greatest adventures of recent times, and the discoveries they yielded gave birth to and nourished the most important idea in biology: evolution. Into the Jungle invites students to step into the lives of naturalists who followed their dreams, and often risked their lives, to explore the unknown and who made some of the most important discoveries that have shaped our understanding of how life has evolved."--
