AP Lab 5 Cell Respiration

Introduction:

Cellular respiration is the release of energy from organic compounds by metabolic chemical oxidation in the mitochondria in each

cell. Cellular respiration involves a number of enzyme mediated reactions. The equation for the oxidation glucose is $C_6H_{12}O_6 + O_2 \rightarrow CO_2 + H_2O + 686$

kilocalories per ...

The AP college board lists 13 labs for its recommended curriculum, however, teachers are not limited to only using their versions of the lab. AP biology teachers submit a curriculum for review and approval and must include laboratory exercises that align with their core ideas. Some of the recommended labs may be too expensive or too time consuming for your

class.

AP Biology: Lab 5: Cell Respiration | AP Central – The ...

Answer 2: "The CO₂ and O₂ probes both work... and, yes, they require the least fussing. But I still opt to use the gas pressure sensor. The gas pressure sensor is least expensive. But that aside, when measuring pressure changes, this lab teaches the students more about experimental design than any other lab we do in AP Biology.
