A hypothesis can be supported, modified, or rejected based on collected data. Hypotheses are tentative explanations that account for a set of facts and can be tested by further investigation. A theory is an explanation of a large body of information, experimental and inferential, and serves as an overarching framework for numerous concepts.

[Voiceover] I would like to welcome you to Biology at Khan Academy. And biology, as you might know, is the study of life. And I can't really imagine anything more interesting than the study of life. And when I say "life," I'm not just talking about us, human beings. I'm talking about all animals. I'm talking about plants. I'm talking about ...
