Innovation Leadership in Practice provides a unique source of new insights on the role of innovation leadership and effective practices through conceptual models, empirical case studies, development interventions, and tools.

Psychology: The Science of Mind and Behaviour
8th Edition Allyn & Bacon

Pinel encourages interactive learning and creative thinking. His clear and engaging presentation makes the material personally and socially relevant to the reader. For undergraduate junior/senior level courses in Behavioral Neuroscience, Physiology of Behavior, Biopsychology, Human Neuropsychology, or Physiological Psychology. Biopsychology is an introduction to the study of the biology of behavior; it focuses on the neural mechanisms of psychological processes. The defining feature of Biopsychology is its unique combination of cutting-edge biopsychological science and student-oriented discourse. Rather than covering topics in the usual textbook fashion, it interweaves the fundamentals of the field with

clinical case studies, personal implications, social issues, helpful metaphors, and memorable anecdotes.

Biological Psychology Pearson Higher Ed
Learn more about how the central nervous system governs human behaviour with an industry-leading text. Biopsychology, Global Edition, 11th Edition by authors John Pinel and Steven Barnes presents a clear, engaging introduction to the topic offering a unique combination of biopsychological science and personal, reader-oriented discourse, ideal for students studying Physiological Psychology and Biopsychology courses. Well-known for its accessible and student-focused approach to the discipline, the book successfully interweaves the fundamentals of the field with clinical case studies, social issues, personal implications, useful

metaphors, and memorable anecdotes. The plethora of themed features, and visual illustrations will challenge your critical thinking skills and support your understanding of the concepts introduced. The latest Edition also incorporates two new emerging themes ("Thinking About Epigenetics" and "Consciousness") and includes up-to-date coverage of the most recent developments in the field. With the engaging, inspiring voices coming from the authors directly to the student, this market-leading text is the ultimate introductory guide, equipping you with the tools and resources you need for a deeper understanding of one of the most rapidly progressing scientific fields. Organise your learning and improve your results with the Revel® Edition for this text. The interactive, digital, and mobile learning environment replaces the traditional printed text and empowers you to actively participate in learning. More than a digital textbook, Revel delivers an engaging blend of author content, media, and assessment. With Revel, you can read and practice in one continuous experience – anytime, anywhere, on any device. If you would like to purchase the Revel® version of this text, search for: 9781292351964 Revel for Biopsychology, Global Edition, Instant Access *DEVELOPMENTAL AND BIOLOGICAL PSYCHOLOGY (CUSTOM EDITION)*. Prentice Hall

Biological processes play a central role in psychology. Drawing on the latest research, this clear and concise textbook provides students with a solid grasp of the relationship

between mind and behavior, and a detailed understanding of the underlying structure and physiological mechanisms that underpin it. The functions of the nervous system are explained and implications for health are explored. Throughout the book, Barnes encourages students to evaluate essential concepts and theoretical issues.

Biopsychology McGraw-Hill/Dushkin
This custom edition is published for the University of Queensland. The material included in this custom edition has been specifically chosen from Pinel and Barnes' Introduction to Biopsychology Global edition, 9th edition to meet your course requirements
