Essentials of Ecology, 4th Edition Modern Library

One of the greatest plays of all time, the compelling tragedy of the tormented young prince of Denmark continues to capture the imaginations of modern audiences worldwide.

Confronted with evidence that his uncle murdered his father, and with his mother's infidelity, Hamlet must find a means of reconciling his longing for oblivion with his duty as avenger. The ghost, Hamlet's feigned madness, Ophelia's death and burial, the play within a play, the "closet scene" in which Hamlet accuses his mother of complicity in murder, and breathtaking swordplay are just some of the elements that make Hamlet an enduring masterpiece of the theater.

Each Edition Includes: • Comprehensive explanatory notes • Vivid introductions and the most up-to-date scholarship • Clear, modernized spelling and punctuation, enabling contemporary readers to understand the Elizabethan English • Completely updated, detailed bibliographies and performance histories • An interpretive essay on film adaptations of the play, along with an extensive filmography

Most biological science departments run general skills courses for their first years, which include some combination of a range of topics from lab skills, writing and presentation to basic maths, statistics and IT. The IT section of these courses tend to include some internet coverage but the trend towards learning how to find, access, manage and correctly cite online resources is rapidly becoming a required necessity for every student throughout their undergraduate career. At present, there are no internet guides that specifically target this audience, despite the increasing importance placed on the use of online resources and the difficulties students encounter trying to make effective use of the information that is available. There are a lot of resources on the internet and students, especially first years, can feel swamped. As well as needing a guide, students need support to help them identify good, reliable information on the net. They also need guidance in administering the organisation of their searches and the materials that they discover on the internet. This simple guide will help bioscience students to access the information they need on the internet, and to make the most efficient and effective use of their time online.
