In her breakthrough generational memoir, Boomer expert Carol Orsborn relates the ups and downs of a tumultuous year spent facing, busting, and ultimately triumphing over the stereotypes of growing old. Along the way, she nurtures a love-starved friend through a doomed affair with a younger man, wrestles with the meaning of an exploding fish, and regains her passion for life at the side of her squirrel-crazed dog, Lucky. The message is as deep as it is engaging. In Carol ’ s own words, “ Plummet into aging, stare mortality in the eye, surrender everything and what else is there left to fear? The way is

perilous, danger on all sides. But we can be part of a generation no longer afraid of age. We are becoming, instead, a generation fierce with age. ”

Alex ’ s book outlines his detailed recollections of his life so far from his earliest memories at the age of 3 right up to the age of 19. His memories are acute and he can give virtual word for word, action by action descriptions of the whole of his life.

This, he explains in the book, is one of his special skills that adds meaning to events that have happened every day as he enjoys retreating to a quiet place to run through the day in film-like sequences. What makes his story come alive is his analysis of what he was feeling and how others around him have responded. This is a heightened level of awareness of self and others that is supposed to be missing in the autism spectrum but Alex uses his sensitivity to share some poignant moments as well as sources of humour. Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration?s three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J.
