One of the great hallmarks of the four canonical gospels is that despite their many similarities, each of them presents Jesus in a slightly different way. Even so, there were far more than four gospels that emerged during the early years of Christianity. In fact, there were, dozens, perhaps hundreds of gospels, each focusing different periods of Jesus' life, as well as differing aspects of his teaching and ministry. Could there be the same unity between these gospels as there is between the four? One way to find out would be to combine them all into a single work and simply see what kind of Jesus they collectively present. The Super Gospel represents the first systematic effort to integrate all of the ancient gospels into a single readable text.
