The wildly popular YouTube star behind CLEAN MY SPACE presents the breakthrough solution to cleaning better with less effort. Melissa Maker is beloved by fans all over the world for her completely re-engineered approach to cleaning. As the dynamic new authority on home and living, Melissa knows that to invest any of our precious time in cleaning, we need to see big, long-lasting results. So, she developed her method to help us get the most out of our effort and keep our homes fresh and welcoming every day. In her long-awaited debut book, she shares her revolutionary 3-step solution:

- Identify the most important areas (MIAs) in your home that need attention
 - Select the proper products, tools, and techniques (PTT) for the job
 - Implement these new cleaning routines so that they stick
- Clean My Space takes the chore out of cleaning with Melissa's incredible tips and cleaning hacks (the power of pretreating!), her lightning fast 5 – 10 minute

“express clean” routines for every room when time is tightest, and her techniques for cleaning even the most daunting places and spaces. And a big bonus: Melissa gives guidance on the best non-toxic, eco-conscious cleaning products and offers natural cleaning solution recipes you can make at home using essential oils to soothe and refresh. With Melissa's simple, groundbreaking method you can truly live in a cleaner, more cheerful, and calming home all the time.

High Water: Duke Snyder found his first job on a stern wheeler when he was sixteen years old. Ten years later he's still on the river aboard an old diesel towboat hauling eight barges of coal toward the Chain of Rocks above St. Louis with all hands on deck facing the ominous rise of high water.

Clean Slate eNet Press
Manic Man: How to Live Successfully with a Severe Mental Illness is an account of Jason Wegner's experiences living with a severe mental illness: bipolar I disorder. The story begins with an outline of Jason's normal life and then describes the hypomanic stage of his illness. The mania starts with his experience of taking the dangerous psychedelic drug LSD and takes off a few weeks later in Tanzania, Africa. He is in a full-blown manic episode

while in Africa, and his behaviours and thoughts captured demonstrate this. Weeks of mania continued after he was home from Africa until he was tricked into going in an ambulance and taken to the hospital's emergency wing. He would be hospitalized in the acute psychiatry ward for 57 days, and seven months of depression follows his hospitalization. To lift himself out of his severe depression, his psychologist, Dr. Kerry Bernes, develops "The Octagon of Life," which is the eight areas of life that he gets Jason to focus on. Following the plan, Jason gets out of depression and experiences post-traumatic growth and becomes a more successful person than he was before his diagnosis. If we want all our students to become better thinkers and learners, we must design rigorous learning experiences that go beyond helping them simply master standards. In this guide, Robyn R. Jackson takes you step by step through the process of planning rigorous instruction—what great teachers do to ensure students have a learning destination that's worth working toward and that the

path they take to get there will help them pass the big tests and become engaged learners, effective problem solvers, and critical thinkers. Here, you'll learn how to

- * Create a rigorous unit assessment to guide your instruction and ensure standards mastery.
- * Select rigorous learning materials by examining the type of thinking you want students to engage in and the type of understanding you want them to acquire.
- * Choose rigorous instructional strategies by looking at ways to help students grasp new content and acquire new skills, apply what they are learning in a meaningful way, use thinking processes to synthesize new understandings, and adapt these understandings to new contexts across disciplines.
- * Create a rigorous learning unit, tailored to your standards and classroom content, and to the students you teach.

Manic Man Createspace Independent Publishing Platform Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods,

radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

This third edition of the famous introductory physics text has been thoroughly revised and updated. The new edition contains two entirely new chapters: "Relativity" as the concluding chapter of the regular version, and "Particles

and the Cosmos" as the concluding chapter of the extended version. New also are 16 essays, distributed throughout the text, on applications of physics to "real world" topics of student interest. Each essay is self-contained and is written by an expert in the topic. The body of the text contains more help in problem-solving and the chapter sections are shorter, making the material more accessible. There are more photos and diagrams than before, including attention-getting chapter-head photos and captions. The number of worked examples has been increased, as has the number of questions, exercises, and problems. In addition, a thread of ideas from relativistic and quantum physics is weaved through the earlier chapters, preparing the way for the later chapters.

Far Side of the Moon Vintage
Home Comforts is something new. For the first

time in nearly a century, a sole author has written a comprehensive book about housekeeping.

This is the Student Solutions Manual to accompany Fundamentals of Physics, 11th Edition. Fundamentals of Physics is renowned for its superior problem-solving skills development, reasoning skills development, and emphasis on conceptual understanding. In this course, interactive pathways of online learning alternate between short content presentations such as video or readings and carefully guided student engagements to simulate a discourse style of teaching 24/7.

The Dog Cancer Survival Guide Simon and Schuster Duff Gibson has spent the better part of three decades in

a hotbed of Olympic sport. As an athlete, Duff was a provincial champion speed skater, a national champion and national team member in bobsleigh, and then a world and Olympic gold medallist in the sport of skeleton. As a coach he led six different athletes to podium finishes at a world level. Competing against, working with, and learning from numerous world-leading athletes and coaches has provided Duff a breadth and depth of experience few others have had. Despite its mischaracterization in popular culture, the mental side of sport is perhaps the most significant aspect, and what very often makes the difference between success and failure, in particular at the highest level. The Tao of Sport explores the commonality amongst elite

performers relating to purpose, passion, and growth, as a means to achieving high performance, or as a means to an end in itself. An inspiring and informative read for athletes and coaches of any level, as well as parents, teachers, and anyone helping others to become the best version of themselves. The Tao of Sport will forever change your perspective on what it really takes to win. High Water Chronicle Books

Luke and Lucy ' s parents threaten to sell their golden retriever, Pistachio, since they don ' t take care of her as they promised. As soon as their parents ' car is out of sight, Luke, Lucy and Pistachio go into the garage. Luke begins painting big white letters on a piece of dark cardboard: Parents for Sale. Watching her brother, Lucy grows impatient and stomps, saying, " Hurry up! Replace the sign as soon as

possible. Otherwise, one of our neighbors will buy Pistachio. " Three families come to buy, trade, or rent their parents without success. As soon as the twins sell their parents to the fairy orphan, she transforms into a witch who wishes to eat them in a stew. How will the twins save their parents? 2015 New York Book Festival: Honorable Mention 2015 Hollywood Book Festival: Honorable Mention Forgotten Nova Scotia Kensington Publishing Corp. A young detective ' s first case in Tennessee puts her on the path of a gruesome serial killer in the New York Times bestselling author ' s romantic thriller. One by one, they will die. He has waited patiently, envisioning their final moments. Their tortured screams, their pleas for mercy—all will be in vain as he executes his sadistic plan. Homicide detective Julia Cass has witnessed plenty of crime scenes. But the murder of a

Chattanooga judge is shocking in its brutality. Teamed with FBI agent Will Brannock, Julia delves into an investigation that soon unearths more bodies—all mutilated in the same way, all left with a gruesome souvenir of a killer's ruthless rage . . . The only way to stop the slaughter is to predict the next victim. But when you're dealing with vengeance at its most ruthless, one wrong move can make you a target . . . and the next word you utter could be your last . . .
