Corps of EngineersThis
volume covers Engineer
operations in support of the
U.S. Army in the war against
Japan. The story begins with
the defense build-up in 1939
and ends with the Japanese
surrender aboard the battleship
Missouri on 2 September 1945.

Geographically, Engineer operations extended from the Panama Canal to India and from Alaska to Australia, in actual or potential areas of conflict. The author has attempted not only to depict various types of Engineer operations but also to indicate how Engineer work helped implement Allied strategy. Included are discussions of the Engineer position in the command structure and a general account of both Engineer combat and service missions within a given theater. -- From the Preface.McGraw transit directoryMotor WestIn-House Bookbinding and Repair In-House Bookbinding and Repair is a working document that contains information on setting up both a basic bookbindery and repair lab (i.e. the design, equipment, tools, and supplies needed) and instructions on rebinding and repairing cloth-bound books.

Highly illustrated to greater enhance its usefulness, this manual also covers various aspects of book repair and preservation, and contains appendixes on manufacturers and suppliers of materials and products discussed in the text, an extensive glossary of terms, a separate section on Internet resources, and a helpful bibliography.
