In the tenth anniversary edition of this award-winning work, Patricia Hill Collins expands the basic arguments of the first edition by adding several important new themes. A new discussion of heterosexism as a system of power, an expanded treatment of images of Black womanhood, U.S. Black feminism's connections to Black Diasporic feminisms, and more attention to the importance of social class and nationalism all appear in the new edition. The concept of intersectionality has become a central topic in academic and activist circles alike. But what exactly does it mean, and why has it emerged as such a vital lens through which to explore how social inequalities of race, class, gender, sexuality, age, ability, and ethnicity shape one another? In this fully revised and expanded second edition of their popular text, Patricia Hill Collins and Sirma Bilge provide a much-needed introduction to the field of intersectional knowledge and praxis. Analyzing the emergence, growth, and contours of the concept of intersectionality, the authors also consider its global reach through an array of new topics such as the rise of far-right populism, reproductive justice, climate change, and digital environments and cultures. Accessibly written and drawing on a plethora of lively examples to illustrate its arguments, the book highlights intersectionality's potential for understanding complex architecture of social and economic inequalities and bringing about social justice-oriented change. Intersectionality will be an invaluable resource for anyone grappling with the main ideas, debates, and new directions in this field.

When *God Lost Her Tongue* explores historical consciousness as captured through the Black feminist imagination that re-centers the perspectives of Black women in the African Diaspora, and revisits how Black women's transatlantic histories are re-imagined and politicized in our contemporary moment. Connecting select historical case studies – from the Caribbean, the African continent, North America, and Europe – while also examining the retelling of these histories in the work of present-day writers and artists, Janell Hobson utilizes a Black feminist lens to rescue the narratives of African-descended women, which have been marginalized, erased, forgotten, and/or mis-remembered. African goddesses crossing the Atlantic with captive Africans. Women leaders igniting the Haitian Revolution. Unnamed Black women in European paintings. African women on different sides of the "door of no return" during the era of the transatlantic slave trade. Even ubiquitous "Black queens" heralded and signified in a

Beyoncé music video or a Janelle Monáe lyric. And then there are those whose names we will never forget, like the iconic Harriet Tubman. This critical interdisciplinary intervention will be key reading for students and researchers studying African American women, Black feminisms, feminist methodologies, Africana studies, and women and gender studies.

This volume, which gathers prominent scholars, feminists, womanists, and creative writers from Africa and the African Diaspora, engages with candor and vigor issues and conflicts in feminism and black women studies - feminism and womanism debates, sisterhood and power struggles, research and documentation questions, elite and grassroots women relationship, urban and rural dichotomy, African and the African Diaspora relationship. Focusing on the pluralism of feminisms, these essays address the conflict between indigenous African feminisms and the radicalism of variants of Western feminism with their emphasis on sexuality and seeming oppositions to motherhood. They collectively argue that the African environment specifically should provide the context for any meaningful analysis of feminisms on the

continent. The volume weaves theoretical questions, personal and collective engagements into a complex tapestry that spans Africa and the African Diaspora - from women organizing for change in South Africa and women's insurgency against colonialism in Nigeria to the problems of doing research on women in Uganda and building of a sisterhood in Memphis, Tennessee.

Despite legislation designed to eliminate unfair racial practices, the United States continues to struggle with a race problem. Some thinkers label this a "new" racism and call for new political responses to it. Using the experiences of African American women and men as a touchstone for analysis, Patricia Hill Collins examines new forms of racism as well as political responses to it. In this incisive and stimulating book, renowned social theorist Patricia Hill Collins investigates how nationalism has operated and re-emerged in the wake of contemporary globalization and offers an interpretation of how black nationalism works today in the wake of changing black youth identity. Hers is the first study to analyze the interplay of racism, nationalism, and feminism in the context of twenty-first century black America. From Black Power to Hip Hop covers a wide range of topics including the significance of race and ethnicity to the American national identity; how ideas about motherhood affect population policies; African American use of black nationalism ideologies as anti-racist practice; and the relationship between black nationalism, feminism and women in the hip-hop generation.

We got stared at a lot. People asked out loudly—some out of curiosity, others out of malice—whether we were men or women or ‘ number nines ’ or devadasis. Several men made bold to touch us, on our backs, on our shoulders. Some attempted to grab our breasts. ‘ Original or duplicate? ’ they shouted and hooted. At such moments I felt despair and wondered if there would ever be a way for us to live with dignity and make a decent living. Revathi was born a boy, but felt and behaved like a girl. In telling her life story, Revathi evokes marvellously the deep unease of being in the wrong body that plagued her from childhood. To be true to herself, to escape the constant violence visited upon her by her family and community, the village-born Revathi ran away to Delhi to join a house of hijras. Her life became an incredible series of dangerous physical and emotional journeys to become a woman and to find love. *The Truth about Me* is the unflinchingly courageous and moving autobiography of a hijra who fought ridicule, persecution and violence both within her home and outside to find a life of dignity.

Feminist Research Practice: A Primer Routledge

*Black Feminist Sociology* offers new writings by established and emerging scholars working in a Black feminist tradition. The book centers Black feminist sociology (BFS) within the sociology canon and widens it to feature Black feminist sociologists both outside the US and the academy. Inspired by a BFS lens, the essays are critical, personal, political and oriented toward social justice. Key themes include the origins of BFS, expositions of BFS orientations to research that extend disciplinary norms, and contradictions of the pleasures and costs of such an approach both academically and personally. Authors explore their

own sociological legacy of intellectual development to raise critical questions of intellectual thought and self-reflexivity. The book highlights the dynamism of BFS so future generations of scholars can expand upon and beyond the book ’ s key themes.

The Feminist Standpoint Revisited, And Other Essays Northeastern Series in Feminis

"Intersectionality intervenes in the field of intersectionality studies: the integrative examination of the effects of racial, gendered, and class power on people's lives. While "intersectionality" circulates as a buzzword, Anna Carastathis joins other critical voices to urge a more careful reading. Challenging the narratives of arrival that surround it, Carastathis argues that intersectionality is a horizon, illuminating ways of thinking that have yet to be realized; consequently, calls to "go beyond" intersectionality are premature. A provisional interpretation of intersectionality can disorient habits of essentialism, categorial purity, and prototypicality and overcome dynamics of segregation and subordination in political movements. Through a close reading of critical race theorist Kimberle Williams Crenshaw's germinal texts, published more than twenty-five years ago, Carastathis urges analytic clarity, contextual rigor, and a politicized, historicized understanding of this widely traveling concept. Intersectionality's roots in social justice movements and critical intellectual projects--specifically Black feminism--must be retraced and synthesized with a decolonial analysis so its radical potential to actualize coalitions can be enacted"--

Beginning with women's experience, the author examines the field's actual

---

practices of reasoning and conceptualization. She argues that standard sociological methods of inquiry make use of ideological practices, transforming the actualities of people's lives into a formalized picture lacking subjects and subjectivity. The method of Smith recommends anchors a Marxist materialism, based in people's activities, to a woman's stand-point based in experience. She uses this method in a radically original way to explore ideology and objectified knowledge as the conceptual practices of ruling. Smith is equally concerned with the application of sociological ideology to the human service bureaucracy and the way institutions of mental health reconstruct women's lives. She provides meticulous accounts of the ways in which police reports, government statistics, hospital records, and psychiatric files are ideologically interpreted, transforming a person's life history in the process. In a revelatory chapter on the biographer Quentin Bell's account of Virginia Woolf's suicide, the author demonstrates how the text implicates the reader in the objectification of Woolf's "psychiatric problems." Highly critical of current sociological practices, *The Conceptual Practices of Power* both recommends and exemplifies the alternative approach that Smith presented in her earlier work, *That Everyday World as Problematic*, also published by Northeastern University Press.
