Master Sergeant (Ret.) George E. "Chik" Hand IV, better known as geo to the public. geo served for 10 years with the 1st Special Forces Operational Detachment-Delta, colloquially known as Delta Force. As the U.S. Army's premier counterterrorism, hostage rescue, and direct action Special Missions Unit (SMU), Delta Force has been at the tip of the spear of the American military ever since the Iranian hostage crisis in 1979. To serve there, a man has to climb physical and mental mountains; to remain there, a man has to show remarkable consistency and

professionalism. Before his assignment to Delta, geo served in the 7th and 1st Special Forces Groups as a Green Beret. A rare wordsmith, geo is a master of the English language. But, it takes more than that to create a compelling memoir, especially one so heavily focused on others. Indeed, it takes empathy and emotional intellect. By empathizing with his subjects, geo puts you right next to them. You can see them breaching a door; you can smell their sweat after an operation; you can hear the radio chatter and the Little Bird helicopters whooping above; you can sense the joke that's about to crack and send everyone

rolling; you can feel the pain of loss and the emptiness that death carves. That's why readers of all ages and walks of life rally around his stories.

The Athena Project Oxford University Press

Late in the afternoon of Sunday, 3 October 1993, 140 elite US soldiers abseiled from helicopters into a teeming market neighbourhood in the heart of the city of Mogadishu, Somalia. Their mission was to abduct two top lieutenants of a Somali warlord and return to base. It was supposed to take them about an hour. Instead, they were pinned down through a long and terrible night in a hostile city, fighting for their lives against thousands

of heavily armed Somalis. When the unit was rescued the following morning, 18 American soldiers were dead and more than 70 badly injured. The Somali toll was far worse - more than 500 killed and over 1000 injured. Authoritative, and insightful, *Black Hawk Down* is a minute-by-minute account of modern war.

All Necessary Force Simon and Schuster
Exuberant storytelling full of wry comedy, dark history, and devastating satire—by the celebrated and original author of the #1 New York Times bestseller, *Say You 're One of Them*. From a

suspiciously cheap Hell 's Kitchen walk-up, Nigerian editor and winner of a Toni Morrison Publishing Fellowship Ekong Udousoro is about to begin the opportunity of a lifetime: to learn the ins and outs of the publishing industry from its incandescent epicenter. While his sophisticated colleagues meet him with kindness and hospitality, he is soon exposed to a colder, ruthlessly commercial underbelly—callous agents, greedy landlords, boorish and hostile neighbors, and, beneath a superficial cosmopolitanism, a bedrock of white cultural superiority and racist assumptions about Africa, its peoples, and worst of all, its food. Reckoning, at the same time, with the recent history of the devastating and brutal Biafran War, in which Ekong 's people were a minority of a minority caught up in the mutual slaughter of majority tribes, Ekong 's life in New York becomes a saga of unanticipated strife. The

great apartment deal wrangled by his editor turns out to be an illegal sublet crawling with bedbugs. The lights of Times Square slide off the hardened veneer of New Yorkers plowing past the tourists. A collective antagonism toward the “ other ” consumes Ekong ’ s daily life. Yet in overcoming misunderstandings with his neighbors, Chinese and Latino and African American, and in bonding with his true allies at work and advocating for healing back home, Ekong proves that there is still hope in sharing our stories. Akpan ’ s prose melds humor, tenderness, and pain to explore the myriad ways that tribalisms define life everywhere, from the villages of Nigeria to the villages within New York City. *New York, My Village* is a triumph of storytelling and a testament to the life-sustaining power of community across borders and across boroughs. *Murder at Camp Delta* Center Street

Alpha St. Martin's Press

The New York Times bestseller *Kill Bin Laden* is an explosive first-hand account of a Delta Force commando's hunt for the world's most wanted man. The mission was to kill the most wanted man in the world—an operation of such magnitude that it couldn't be handled by just any military or intelligence force. The best America had to offer was needed. As such, the task was handed to roughly forty members of America's supersecret counterterrorist unit formally known as 1st Special Forces Operational Detachment-Delta; more popularly, the elite and mysterious unit Delta Force. Told by senior ranking military officer Dalton Fury, this is the real story of the operation, the first eyewitness account of the Battle of Tora Bora, and the first book to detail just how close Delta Force came to capturing bin Laden, how

close U.S. bombers and fighter aircraft came to killing him, and exactly why he slipped through our fingers. Lastly, this is an extremely rare inside look at the shadowy world of Delta Force and a detailed account of these warriors in battle.

Never have so many possessed the means to be so lethal. The diffusion of modern technology (robotics, cyber weapons, 3-D printing, autonomous systems, and artificial intelligence) to ordinary people has given them access to weapons of mass violence previously monopolized by the state. In recent years, states have attempted to stem the flow of such weapons to individuals and non-state groups, but their efforts are failing. As Audrey Kurth Cronin explains in *Power to the People*, what we are seeing now is an exacerbation of an age-old trend. Over the centuries, the most surprising developments in warfare have occurred because of advances in technologies combined with changes in who can use them. Indeed, accessible innovations

in destructive force have long driven new patterns of global security - unless we act strategically. political violence. When Nobel invented dynamite and Kalashnikov designed the AK-47, each inadvertently spurred terrorist and insurgent movements that killed millions and upended the international system. That history illuminates our own situation, in which emerging technologies are altering society and redistributing power. The twenty-first century "sharing economy" has already disrupted every institution, including the armed forces. New "open" technologies are transforming access to the means of violence. Just as importantly, higher-order functions that previously had been exclusively under state military control - mass mobilization, force projection, and systems integration - are being harnessed by non-state actors. Cronin closes by focusing on how to respond so that we both preserve the benefits of emerging technologies yet reduce the risks. Power, in the form of lethal technology, is flowing to the people, but the same technologies that empower can imperil

In this heart-stopping thriller from New York Times bestselling author Brad Taylor, Pike Logan returns with his most dangerous and personal threat yet: a Taskforce Operator gone rogue. For years, the extralegal counterterrorist unit known as the Taskforce has worked in the shadows, anticipating and preventing attacks around the globe. A Special Forces soldier is killed on an operation in Afghanistan, and complicit in the attack is a government official of an allied nation. While the US administration wants to forget the casualty, one Taskforce member will not. When he sets out to avenge his brother's death, his actions threaten to not only expose the Taskforce's activities, but also destroy a web of alliances against a greater evil. Pike Logan understands the desire, but also the danger. Brought in to eliminate the risk, he's now forced to choose between his friend and the administration he's sworn to protect, while unbeknownst to either of them, the soldier's death is only the beginning...
