As part of the team sent to rescue American hostages in Tehran, Haney offers a first-person description of that failed mission that is a chilling, compelling account of a bold maneuver undone by chance—and a few fatal mistakes. From fighting guerrilla warfare in Honduras to rescuing missionaries in Sudan and leading the way onto the island of Grenada, Eric Haney captures the daring and discipline that distinguish the men of Delta Force. All Necessary Force Simon and Schuster
IN combating terror, America can no longer depend on its conventional military superiority and the use of sophisticated

technology. We are fighting guerrilla wars, against insurgents hidden in remote regions, often deep among the local population. In battles such as these, squadrons of billion-dollar bombers and naval fleets mean much less than on-the-ground intelligence and the ability to organize local forces. That's why, more than ever before, we need men like those of the Army Special Forces—the legendary Green Berets. In *Chosen Soldier*, Dick Couch—a former Navy SEAL widely admired for his books about SEAL training and operations—offers an unprecedented view of the training of the Army Special Forces warrior. Each year, several thousand enlisted men and several hundred officers volunteer for Special Forces training; less than a quarter of those who apply will complete the course. *Chosen Soldier* spells out in fascinating detail the arduous regimen these men undergo—the demanding selection process and grueling field exercises, the high-level technical training and intensive language courses, and the simulated battle problems that test everything from how well they gather operational intelligence to their skills at negotiating with volatile, often hostile, local leaders. Green Berets are expected to be deadly in combat, yes, but their responsibilities go far beyond those of other Special Operations fighters; they're taught to operate in foreign cultures, often behind enemy lines; to recruit, train, and lead local forces; to gather intelligence in hostile territory; to forge bonds across languages and cultures. They must not only be experts in such fields as explosives, communications, engineering, and field medicine, but also be able to teach those skills to others. Each and every Green Beret must function as tactical combat leader, negotiator, teacher, drill sergeant, and diplomat. These tasks require more than just physical prowess; they require a unique mix of character, intelligence, language skills, and—most of all—adaptability. It's no wonder that the Green Berets' training regimen is known as the hardest in the world. Drawing on his unprecedented access to the closed world of Army Special Forces training, Dick Couch paints a vivid, intimate portrait of these extraordinary men and the process that forges America's smartest, most versatile, and most valuable fighting force. One Rough Man St. Martin's Press

Already winning acclaim as one of the best accounts of combat ever written, *Black Hawk Down* is a minute-by-minute, heart-stopping account of the 1993 raid on Mogadishu, Somalia. Late in the afternoon of Sunday, October 3 1993, 140 elite US Soldiers abseiled from helicopters into a teeming market neighbourhood in the heart of the city. Their mission was to abduct two top lieutenants of a Somali warlord and return to base. It was supposed to take them about an hour. Instead, they were pinned down through a long and terrible night in a hostile city, fighting for their lives against thousands of heavily armed Somalis. Two of their high-tech helicopters were shot out of the sky. When the unit was rescued the following morning, eighteen American soldiers were dead and more than seventy badly injured. The Somali toll was far worse - more than five hundred killed and over a thousand injured. Authoritative, gripping, and insightful, *Black Hawk Down* is destined to become a classic of war reporting. It is already the most accurate, detailed account of modern combat ever written.

The explosive conclusion to the New York Times bestselling series. In Dalton Fury's Execute Authority, Kolt "Racer" Raynor and his

Delta Force squadron are in Greece, providing VIP security for the newly elected—and deeply controversial—American president on his desperate mission to hold the NATO alliance together. Then, the unimaginable happens. Just as the president is arriving, an assassin's bullet takes the life of the Greek prime minister. The president is safe, but Raynor recognizes the killer—Rasim Miric—by his grisly signature: a bullet through his target's left eye. The hunt for the assassin ends when Miric, to all appearances, blows himself up in an explosion that levels an apartment block, but Raynor refuses to accept that the sniper is really dead. Miric's grudge is with America, and one American in particular—the Delta Force operator who cost him an eye, Kolt Raynor. Raynor believes that Miric's killing spree is only just beginning, and his suspicions are proved true when Miric is

photographed crossing the border into the United States.

Forbidden by law from operating on American soil, Raynor will have to bend the rules until they break, risking everything in order to run the assassin down before he can strike again. But what Raynor doesn't realize is that Rasim Miric is also hunting him.
