Inside Delta Force Penguin
The New York Times bestselling true

account of John Chapman, Medal of Honor recipient and Special Ops Combat Controller, and his heroic one-man stand during the Afghan War, as he sacrificed his life to save the lives of twenty-three comrades-in-arms. In the predawn hours of March 4, 2002, just below the 10,469-foot peak of a mountain in eastern Afghanistan, a fierce battle raged. Outnumbered by Al Qaeda fighters, Air Force Combat Controller John Chapman and a handful of Navy SEALs struggled to take the summit in a desperate bid to find a lost teammate. Chapman, leading the charge, was gravely wounded in the initial assault. Believing he was dead, his SEAL leader ordered a retreat. Chapman regained consciousness alone, with the enemy closing in on three sides.

John Chapman's subsequent display of incredible valor -- first saving the lives of his SEAL teammates and then, knowing he was mortally wounded, single-handedly engaging two dozen hardened fighters to save the lives of an incoming rescue squad -- posthumously earned him the Medal of Honor. Chapman is the first airman in nearly fifty years to be given the distinction reserved for America's greatest heroes. *Alone at Dawn* is also a behind-the-scenes look at the Air Force Combat Controllers: the world's deadliest and most versatile special operations force, whose members must not only exceed the qualifications of Navy SEAL and Army Delta Force teams but also act with sharp decisiveness and deft precision -- even in the face of life-

threatening danger. Drawing from firsthand accounts, classified documents, dramatic video footage, and extensive interviews with leaders and survivors of the operation, *Alone at Dawn* is the story of an extraordinary man's brave last stand and the brotherhood that forged him.

Power to the People St. Martin's Griffin
Never have so many possessed the means to be so lethal. The diffusion of modern technology (robotics, cyber weapons, 3-D printing, autonomous systems, and artificial intelligence) to ordinary people has given them access to weapons of mass violence previously monopolized by the state. In recent years, states have attempted to stem the flow of such weapons to individuals and non-state groups, but their efforts are failing. As Audrey Kurth Cronin explains in *Power to the People*, what

we are seeing now is an exacerbation of an age-old trend. Over the centuries, the most surprising developments in warfare have occurred because of advances in technologies combined with changes in who can use them. Indeed, accessible innovations in destructive force have long driven new patterns of political violence. When Nobel invented dynamite and Kalashnikov designed the AK-47, each inadvertently spurred terrorist and insurgent movements that killed millions and upended the international system. That history illuminates our own situation, in which emerging technologies are altering society and redistributing power. The twenty-first century "sharing economy" has already disrupted every institution, including the armed forces. New "open" technologies are transforming access to the means of violence. Just as importantly, higher-order functions that previously had been exclusively under state military control - mass mobilization, force projection, and systems integration - are being harnessed by non-state actors. Cronin closes by focusing on how to respond so that we both preserve the benefits of emerging technologies yet reduce the risks. Power, in the form of lethal technology, is flowing to the people, but the same technologies that empower can imperil global security - unless we act strategically.

One Killer Force MCD

Late in the afternoon of Sunday, 3 October 1993, 140 elite US soldiers abseiled from helicopters into a teeming market neighbourhood in the heart of the city of Mogadishu, Somalia. Their

mission was to abduct two top lieutenants of a Somali warlord and return to base. It was supposed to take them about an hour. Instead, they were pinned down through a long and terrible night in a hostile city, fighting for their lives against thousands of heavily armed Somalis. When the unit was rescued the following morning, 18 American soldiers were dead and more than 70 badly injured. The Somali toll was far worse - more than 500 killed and over 1000 injured. Authoritative, and insightful, *Black Hawk*

Down is a minute-by-minute account of modern war. **Black Ops** Dell Publishing Company The bestselling author of *Daemon* returns with a near-future technological thriller, in which a charismatic billionaire recruits a team of adventurers to launch the first deep space mining operation--a mission that could alter the trajectory of human civilization. When itinerant cave diver James Tighe receives an invitation to billionaire Nathan Joyce's private island, he thinks it must be a mistake. But Tighe's unique skill set makes him a prime candidate for Joyce's high-risk venture to mine a near-earth asteroid--with the goal of kick-starting an entire off-world

economy. The potential rewards and personal risks are staggering, but the competition is fierce and the stakes couldn't be higher. Isolated and pushed beyond their breaking points, Tighe and his fellow twenty-first century adventurers--ex-soldiers, former astronauts, BASE jumpers, and mountain climbers--must rely on each other to survive not only the dangers of a multi-year expedition but the harsh realities of business in space. They're determined to transform humanity from an Earth-bound species to a space-faring one--or die trying.

Master Sergeant (Ret.) George E. "Chik" Hand IV, better known as geo to the public. geo served for 10 years with the 1st Special Forces Operational Detachment-Delta, colloquially known as Delta Force. As the U.S. Army's premier counterterrorism, hostage rescue, and direct action Special Missions Unit (SMU), Delta Force has been at the tip of the spear of the American military ever since the Iranian hostage crisis in 1979. To serve there, a man has to climb physical and mental mountains; to remain there, a man has to show remarkable consistency and professionalism. Before his assignment to Delta, geo served in the 7th and 1st Special Forces

Groups as a Green Beret. A rare wordsmith, geo is a master of the English language. But, it takes more than that to create a compelling memoir, especially one so heavily focused on others. Indeed, it takes empathy and emotional intellect. By empathizing with his subjects, geo puts you right next to them. You can see them breaching a door; you can smell their sweat after an operation; you can hear the radio chatter and the Little Bird helicopters whooping above; you can sense the joke that's about to crack and send everyone rolling; you can feel the pain of loss and the emptiness that death carves. That's why readers of all ages and walks of life rally around his

stories.

"In the world of black-op thrillers, Mitch Rapp continues to be among the best of the best" (Booklist, starred review), and he returns in the #1 New York Times bestselling series alone and targeted by a country that is supposed to be one of America's closest allies. After 9/11, the

United States made one of the most secretive and dangerous deals in its history—the evidence against the powerful Saudis who coordinated the attack would be buried and in return, King Faisal would promise to keep the oil flowing and deal with the conspirators in his midst. But when the king's own nephew is discovered funding ISIS, the furious President gives Rapp his next mission: he must find out more about the high-level Saudis involved in the scheme and kill them. The catch? Rapp will get no support from the

United States. Forced to make a decision that will change his life forever, Rapp quits the CIA and assembles a group of independent contractors to help him complete the mission. They've barely begun unraveling the connections between the Saudi government and ISIS when the brilliant new head of the intelligence directorate discovers their efforts. With Rapp getting too close, he threatens to go public with the details of the post-9/11 agreement between the two countries. Facing an international incident that could end his political career, the President orders America's intelligence agencies to join the Saudis' effort to hunt the former CIA man down. Rapp, supported only by a team of mercenaries with dubious allegiances, finds himself at the center of the most elaborate manhunt in history. With white-knuckled twists and turns leading to "an explosive climax" (Publishers Weekly), *Enemy of the State* is an unputdownable thrill ride that will keep you guessing until the final page. *Enemy of the State* St. Martin's

Where Men Win Glory and Into the

written” (The New York Times
Book Review) and startling
account, Pulitzer Prize-winning
New York Times correspondent
David Philipps reveals a
powerful moral crucible, one
that would define the American
military during the years of
combat that became known as “the
forever war.” When the Navy
SEALs of Alpha platoon returned

from their 2017 deployment to
Iraq, a group of them reported
their chief, Eddie Gallagher,
for war crimes, alleging that
he'd stabbed a prisoner in cold
blood and taken lethal sniper
shots at unarmed civilians. The
story of Alpha's war, both in
Iraq and in the shocking trial
that followed the men's
accusations, would complicate
the SEALs' post-9/11 hero
narrative, turning brothers-in-
arms against one another and
bringing into stark relief the
choice that elite soldiers face
between loyalty to their unit
and to their country. One of the
great stories written about

American special forces, Alpha is by turns a battlefield drama, a courtroom thriller, and a compelling examination of how soldiers define themselves and live with the decisions in the heat of combat.

All Necessary Force Grand Central Publishing

"No matter how skilled the writer of nonfiction, you are always getting the story secondhand. Here's a chance to go right to the source. . . . These men were there." -MARK BOWDEN (from the Foreword) It started as a mission to capture a Somali warlord. It turned into a disastrous urban

firefight and death-defying rescue operation that shocked the world and rattled a great nation. Now the 1993 battle for Mogadishu, Somalia-the incident that was the basis of the book and film *Black Hawk Down*-is remembered by the men who fought and survived it. Six of the best in our military recall their brutal experiences and brave contributions in these never-before-published, firstperson accounts. "Operation Gothic Serpent," by Matt Eversmann: As a "chalk" leader, Eversmann was part of the first group of Rangers to "fast rope" from the *Black Hawk* helicopters. It was

his chalk that suffered the first casualty of the battle. "Sua Sponte: Of Their Own Accord," by Raleigh Cash: Responsible for controlling and directing fire support for the platoon, Cash entered the raging battle in the ground convoy sent to rescue his besieged brothers in arms. "Through My Eyes," by Mike Kurth: One of only two African Americans in the battle, Kurth confronted his buddies' deaths, realizing that "the only people whom I had let get anywhere near me since I was a child were gone." "What Was Left Behind," by John Belman: He roped into the biggest firefight of the battle and considers some of the mistakes that were made, such as using Black Hawk helicopters to provide sniper cover. "Be Careful What You Wish For," by Tim Wilkinson: He was one of the Air Force pararescuemen or PJs—the highly trained specialists for whom "That Others May Live" is no catchphrase but a credo—and sums up his incomprehensible courage as "just holding up my end of the deal on a bad day." "On Friendship and Firefights," by Dan Schilling: As a combat controller, he was one of the original planners for the deployment of SOF forces to

Mogadishu in the spring of 1993. During the battle, he survived the initial assault and carnage of the vehicle convoys only to return to the city to rescue his two closest friends, becoming, literally, "Last Out." With America's withdrawal from Somalia an oft-cited incitement to Osama bin Laden, it is imperative to revisit this seminal military mission and learn its lessons from the men who were there and, amazingly, are still here.

The explosive conclusion to the New York Times bestselling series. In Dalton Fury's Execute Authority, Kolt "Racer" Raynor and his Delta Force squadron are in

Greece, providing VIP security for the newly elected—and deeply controversial—American president on his desperate mission to hold the NATO alliance together. Then, the unimaginable happens. Just as the president is arriving, an assassin's bullet takes the life of the Greek prime minister. The president is safe, but Raynor recognizes the killer—Rasim Miric—by his grisly signature: a bullet through his target's left eye. The hunt for the assassin ends when Miric, to all appearances, blows himself up in an explosion that levels an apartment block, but Raynor refuses to accept that the sniper is really dead. Miric's grudge is with America, and one American in particular—the Delta Force operator who cost him an eye, Kolt Raynor. Raynor believes that Miric's killing spree is only just beginning, and his suspicions are proved true when Miric is photographed crossing the border into the United States. Forbidden by law from operating on American soil, Raynor will have to bend the rules until they break, risking everything in order to run the assassin down before he can strike again. But what Raynor doesn't realize is that Rasim Miric is also hunting him.
